The new 15th edition of Trade Shows Worldwide contains comprehensive coverage of shows, their sponsors and organizers, convention facilities, service providers and sources of industry information. With its global perspective and clearly organized format, Trade Shows Worldwide allows industry professionals, city planners, information professionals and business executives quick access to the information vital for success and timely decision-making.

Fair trade jewellery has been around for a while - but while those crafting it worked under Fair Trade principles, the gold, silver and precious stones they were using came from some very murky places. Small scale mining is the second biggest global employer, and many of those mines pay a pittance, forcing their workers to labour long hours in dirty and dangerous conditions - for a pittance. Informed by those in the jewellery trade that this would never change, Greg Valerio set out to prove them wrong. Fairly traded gold is now available in the UK, although the battle continues for other metals and products.

An encyclopedic view of doing business with Australia. Contains the how-to, where-to and who-with information needed to operate internationally.

Respected international experts such as Michael Bordo, Larry Sjaastad and Ken Clements are brought together in a wonderfully well researched new book on this most important of topics. This comprehensive, well-written book provides all you need to know about Gold and the Modern World Economy.

This book presents a radically innovative view on trade shows as knowledge-rich places, where firms learn through observation and interaction with other economic actors, and as enablers, rather than mere consequences, of globalization. It is organized in four parts. Part I lays out the conceptual foundations of the knowledge-based perspective, from the early development of trade fairs to modern-day events. Part II analyses specific global developments, focussing on the trade show ecologies of Europe, North America, and the Asia-Pacific region. Part III investigates differences in the nature of knowledge generation practices across international hub shows, exports shows, and import shows in different industries, and investigates competition between such events. Part IV discusses the implications of a knowledge-based conceptualisation of trade shows.

The world trade has decelerated in recent years amidst global slowdown and COVID-19 outbreak. In the wake of the changing course of global trade, this book studies the key and emerging trade policies and negotiation issues faced by India in international trade and offers policy options for development. In 2019, World Trade Organization (WTO) celebrated 25 years of establishment. India, the founder-member of the WTO, has been forced to reverse the trade liberalization process by raising the customs duties on some products in recent years. Other countries have also been promoting protectionism. World Trade and India: Multilateralism, Progress and Policy Response discusses mitigating strategies that would help the Indian economy in building resilience to trade shocks and improve competitiveness of exports. The book unravels the complex interconnections between multilateralism and developing economies like India, and presents a detailed evaluation on where the nations stand today in global trade. It offers policy suggestions for a better future.
