The first book to present Gilles Deleuze's philosophy in language the nonphilosopher can understand. This book is a map of the work of Gilles Deleuze—the man Michel Foucault would call the "only real philosophical intelligence in France." It is not only for professional philosophers, but for those engaged in what Deleuze called the "nonphilosophical understanding of philosophy" in other domains, such as the arts, architecture, design, urbanism, new technologies, and politics. For Deleuze's philosophy is meant to go off in many directions at once, opening up zones of unforeseen connections between disciplines. Rajchman isolates the logic at the heart of Deleuze's philosophy and the "image of thought" that it supposes. He then works out its implications for social and cultural thought, as well as for art and design—for how to do critical theory today. In this way he clarifies the aims and assumptions of a philosophy that looks constantly to invent new ways to affirm the "free differences" and the "complex repetitions" in the histories and spaces in which we find ourselves. He looks at the particular realism and empiricism that this affirmation implies and how they might be used to diagnose new forces confronting us today. In the process, he explores the many connections that Deleuze himself constructs in working out his philosophy, with the arts, political movements, even the neurosciences and artificial intelligence.

MyMaths for Key Stage 3 is the brand new course that works with MyMaths to deliver the new curriculum. This student book is for higher ability students nearing the end of KS3. Its unique emphasis on visible progression and visual engagement, along with direct links to the MyMaths site, all help to bring maths alive for your higher-level students.

Each year, Americans consume hundreds of food products that contain truly dangerous compounds, including heavy metals, pesticides, and other harmful additives--with the blessing of the FDA. Why is this happening and why haven't you heard about it? In Unsafe at Any Meal, Dr. Renee Dufault, former food investigator for the Food and Drug Administration, provides the startling answers. While at the FDA, Dr. Dufault discovered that mercury--a highly toxic metal--was contaminating the plumbing systems of many food manufacturing plants. Upon further examination, she discovered that the same mercury was also evident in a number of processed foods commonly sold in supermarkets. When Dr. Dufault revealed these disturbing findings to her superiors, she was told to stop her investigation. Her continued efforts to raise the issue always met with a dead end, so she chose to take an early retirement from the FDA. Dr. Dufault then devoted her energy to making the public aware of the insidious dangers that contaminate our food. In 2010, she founded an organization of scientists to study the scope of this problem and has published numerous research articles on the topic with little fanfare. To expose what still seems to be a well-kept secret by the FDA, she has written Unsafe at Any Meal to provide consumers with the information they need to know. The book begins with the author's story leading up to the creation of this work. It then describes the various toxic substances that are most commonly found in our food supply, and explains how they affect your genes, health, and the surrounding environment. After examining the Standard American Diet, which is sorely lacking in disease-preventing nutrients, it discusses the country's trend toward consuming a skyrocketing amount of ingredients that can contain heavy metals. It further shows how exposure to these heavy metals can contribute to conditions such as ADHD or autism. Also included is a helpful guide to reading food labels, recognizing misleading marketing tactics, and knowing what to look for--and what to look out for--in the aisles of your grocery store. Over fifty years ago, Rachel Carson's book Silent Spring exposed the dangers of DDT in our food supply. Unfortunately, it seems that the problem of food contamination has actually become worse. Backed by research and first-hand experience, Dr. Dufault reveals how the FDA has failed us, and outlines how you can protect yourself and your family by knowing what to avoid and by filling your kitchen with food that is clear of toxins.

A comprehensive guide to understanding and using storytelling intherapy with kids and teens "George Burns is a highly experienced clinician with the remarkableability to create, discover, and tell engaging stories that canteach us all the most important lessons in life. With 101 HealingStories for Kids and Teens, he strives especially to help kidsand teens learn these life lessons early on, providing themopportunities for getting help and even learning to thinkpreventively." -Michael D. Yapko, PhD | Author of Breaking the Patterns ofDepression and Hand-Me-Down Blues "George Burns takes the reader on a wonderful journey, balancingmetaphor, good therapeutic technique, and empirical foundationsduring the trip. Given that Burns utilizes all three aspects of theConfucian story referred to in the book-teaching, showing, andinvolving-readers should increase their understanding of howstories can be used therapeutically." -Richard G. Whiteside, MSW | Author of The Art of Using and LosingControl and Working with Difficult Clients: A Practical Guide toBetter Therapy "A treasure trove for parents and for professionals in thechild-development fields." -Jeffrey K. Zeig, PhD | Director, The Milton H. EricksonFoundation Stories can play an important and potent role in therapy withchildren and adolescents-helping them develop the skills to copewith and survive a myriad of life situations. In many cases,stories provide the most effective means of communicating what kidsand teens might not want to discuss directly. 101 Healing Stories for Kids and Teens provides straightforwardadvice on using storytelling and metaphors in a variety oftherapeutic settings. Ideal for all who work with young people,this unique resource can be combined with other inventive andevidence-based techniques such as play, art, music, and dramatherapies as well as solution focused, hypnotic, andcognitive-behavioral approaches. Offering guidance for newclinicians and seasoned professionals, George Burns's latest workdelivers a unique combination-information on incorporatingstorytelling in therapy, dozens of ready-made stories, and tips forcreating original therapeutic stories. Innovative chapters include: * Guidance for effective storytelling * Using metaphors effectively * Where to get ideas for healing stories * Planning and presenting healing stories * Teaching parents to use healing stories In addition, 101 Healing Stories for Kids and Teens includes dozensof story ideas designed to address a variety of issues, suchas: * Enriching learning * Teaching self-care * Changing patterns of behavior * Managing relationships, emotions, and life challenges * Creating helpful thoughts * Developing life skills and problem-solving techniques

This introduction to linear algebra offers a balance between abstraction/theory and computational skills. KEY TOPICS: Linear Equations and Matrices. Real Vector Spaces. Inner Product Spaces. Linear Transformations and Matrices. Determinants. Eigenvalues and Eigenvectors. Differential Equations. MATLAB for Linear Algebra. MATLAB Exercises. For anyone needing a basic understanding of matrix theory or computational skills involving linear algebra.

Bestselling author Sandra Brown weaves a tale of murder, passion, and intrigue in the pristine corridors of the White House. Barrie Travis is not famous: she's just a damn good reporter stuck at a low-budget television station. Then, her old friend and now First Lady calls her to investigate the supposed SIDS death of her baby. Stunned by grief after the loss of her infant son, the President's wife hints that her child may have murdered. Blind to everything but finding the truth, Barrie delves into the private lives of the president and his wife and uncovers dark and terrible secrets that will test her ethics, her patriotism, and her courage. With the help of Gray Bondurant, a mysterious former presidential aide, this story could topple the presidency and change the course of history. In this fast-moving political thriller, Barrie must fight powerful forces that want nothing more than to see the scandalous past-and a certain young reporter-dead and buried.
