The Society of Gynecologic Oncology and ASCCP endorse this document. On August 21, 2018, the U.S. Preventive Services Task Force (USPSTF) published its final recommendation statement 1 on cervical cancer screening in average-risk women Table 1. The major change from the 2012 USPSTF guidelines is that for average-risk women aged 30–65 years, the USPSTF now recommends high-risk human papillomavirus (hrHPV) testing alone every 5 years as an alternative to screening with cervical cytology ...

USPSTF, ACOG) • First Pap test age 21 • Test every three years until age 30 • Age > 30, HPV test with Pap test every 5 years. –If HPV testing unavailable, Pap every 3 years. • No more testing after hysterectomy (if cervix has been removed) or age 65. –With negative Pap history.

Guidelines for Paps, HPV Tests and Managing Abnormal Pap Tests

• Pap Smear Screening begins at age 21 regardless of when sexual activity starts. Adolescents/young women 20 and below are not recommended to have a Pap test or HPV testing. Pap screening may end at age 65 if the Pap history is unremarkable and the patient is low risk. • Screening recommended every 3 years for women 21-29. Women 30-65

To address these issues, the American College of Obstetricians and Gynecologists (ACOG) has released evidence-based guidelines for management of abnormal cervical cytology and histology. The...

ACOG Releases Guidelines for Management of Abnormal ...

The new pap smear guidelines (2012) recommend that a woman's first pap smear should be when she is 21 years old and not before. Being sexual active does not change this recommendation. For women age 21 to 29, only "cytology testing," which looks for abnormal or unhealthy cells under a microscope, should be used.

Download Ebook Acog Guidelines For Ascus Pap Smears

In contrast to ASCUS, neither observation nor a repeat Pap smear is an option because the potential for abnormalities is much higher in the AGUS smear. Management is based on the AGUS subclassification (if given) and the patient's age. To continue reading this article ...

Managing ASCUS and AGUS Pap smears | MDedge ObGyn
Pap results showing ASCUS cells are one of the most common abnormalities seen. If the HPV test results are negative, and a patient has a Pap abnormality showing ASCUS cells, a follow-up Pap test is usually recommended in three years. If the hybrid capture test results are positive, with ASCUS, a colposcopy is recommended.
