ACCA F5 Workbook Lecture 1 Activity Based Costing

sir "number of inspection during production" is a bit confusing because it might refer to both "the number of inspection during the whole production" in which case total inspection will be 8 (3 + 5) but if it is assumed that "the number of inspection during each of the production run" which i did, the total inspections would be 110 (13\*5+15\*3). my question is how do we avoid these ...

PM Chapter 1 Questions Activity based costing

The company's activity based costing system has the following activity cost pools and activity measures: Costs assigned to the "other" activity cost pool have no activity measure; they consist of the costs of unused capacity and organization-sustaining costs - neither of which are assigned to products, orders or customers.

---

Activity Based Costing Example/Problem:

Activity-based costing. What we want to do is to get a more accurate estimate of what each unit costs to produce, and to do this we have to examine what activities are necessary to produce each unit, because activities usually have a cost attached. This is the basis of activity-based costing (ABC).

---

Activity-based costing | F5 Performance Management | ACCA ...

Activity-based costing is a method of assigning indirect costs to products and services by identifying cost of each activity involved in the production process and assigning these costs to each product based on its consumption of each activity. Activity-based costing is a more refined approach to costing products and services than the traditional cost allocation methods. It involves the following steps:
