### NASA/ADS – Astrophysics Data System

Physical science is the study, measurement and observation of nonliving objects whereas biological science is the study of living objects. Astronomy, physics, chemistry and earth sciences are the major fields within physical science, and they contain several subfields.

### What Are Some Examples of Physical Science?

Physical science is an encompassing term for the branches of natural science that study non-living systems, in contrast to the life sciences. However, the term "physical" creates an unintended, somewhat arbitrary distinction, since many branches of physical science also study biological phenomena. There is a difference between physical science ...
