Many questions arise of an economic nature that are only partially addressed by standard economic analysis. These lacunae give rise to particular lines of critique in economics, including a wide-ranging and increasingly cogent feminist approach to reenvisioning economics. This book provides a comprehensive description of this intriguing new area of feminist economics. It includes discussion of what constitutes feminist economics and how feminist economics is different from other approaches. The intellectual origins of the area are explicated, and the current state of the subfield outlined. Specific topics covered include conflict over terminology, pedagogy, and content in the field of economics, measurement of the unmeasured economy, the role of caring labor in the economy, heteronormativity in economics, feminist approaches to economic development, multiple approaches to empiricism, modeling of intrahousehold relationships, consideration of the role of property rights in reifying gender roles, differential effects of international trade and finance by gender, and feminist approaches to public finance and social welfare.

August Reinisch gives a broad overview of the entire field of international investment law that has emerged as an important subfield of international economic law over the last decades. As a result of the boom of investment arbitration since the late 1990s, core questions of the substantive treatment of foreign investors are analysed. Combining an academic and a practical perspective, this

book has been written to provide an introduction to investment law for lawyers, political scientists, economists as well as those interested in international relations.

In this thoroughly revised and updated second edition, Mariana Mota Prado and Michael J. Trebilcock offer a succinct and readable introduction to the main concepts and debates in the field of law and development. They examine the role of legal systems and institutions, investigate perceptions around what laws and legal arrangements encourage and facilitate development, and probe the issues arising in both private law and public law as well as in international economic relations. Written with the insight of two top experts in the field, this Advanced Introduction covers the most recent trends in law and development research and highlights areas that remain underexplored.

This Second Edition provides an updated and succinct, yet highly informative overview of the key issues surrounding taxation and international law from Reuven Avi-Yonah, a leading authority on international tax. This small but powerful book surveys the nuances of the varying taxation systems, offering expert insight into the scope, reach and nature of international tax regimes, as well as providing an excellent platform for understanding how the principles of jurisdiction apply to tax and the connected tools that are used by countries in imposing taxes. It includes new material on BEPS, the EU Anti Tax Avoidance Package, and the US Tax Cuts and Jobs Act.

A fantastic introduction to international trade! Trebilcock does an outstanding job in breaking through the myth that international trade is somehow too hard to learn without years of study. The field is in desperate need of an expertly written yet accessible presentation, and now it has one. This should be everyone's first book on the subject. - Andrew Guzman, University of California, US Michael Trebilcock is one of the leading scholars in the world on the law and economics of international trade. In this compact volume, he offers a concise and lucid survey of the legal and policy issues associated with this increasingly important body of law. It gives non-specialists an accessible introduction to the major issue areas, and is full of insights that specialists will find useful as well. - Alan O. Sykes, Stanford Law School, US This elegantly written and essential volume fills three important gaps. First, it provides an admirably accessible and precise explanation of international trade law, serving to inform students and neophyte practitioners. Second, it encapsulates Prof. Trebilcock's mastery of the doctrine and economic rationales of trade law, serving to inform scholars and advanced practitioners. Third, it develops a well-informed, nuanced, and wise critique of trade law, pointing the way forward for policy-makers. - Joel P. Trachtman, Tufts University, US Michael Trebilcock is one of the intellectual giants in the law of international trade. This work makes an important contribution to our understanding of trade law and will become a classic in the field. It is masterly. -

Jagdish Bhagwati, Columbia University, US This book provides a short, straightforward account of the basic structure and principles of international trade law written by one of the leading authorities in this field. The book covers, in a series of short chapters, all the major issues in international trade law, including dispute settlement; the Most Favoured Nation Principle; preferential trade agreements; the National Treatment Principle; contingent protection laws (anti-dumping, countervailing duties and safeguards); trade and agriculture; trade and services; trade and investment; trade-related intellectual property rights; trade policy and domestic health; safety, environmental and labour regulation; and trade policy and developing countries. Each chapter sets out the basic provisions and relevant GATT/WTO agreements governing the issues in question, the central issues or conflicts that have arisen in the interpretation and application of these provisions, leading GATT/WTO case law generated by the formal dispute settlement processes of the GATT/WTO, and unresolved issues that remain a matter of controversy.

Elgar Advanced Introductions are stimulating and thoughtful introductions to major fields in the social sciences and law, expertly written by the world's leading scholars. This authoritative introduction provides a detailed overview of the complexities of the international intellectual property regime and the ways in which it operates. The authors cover the key international institutions and agreements that regulate and inform intellectual property at an international level such as the TRIPS Agreement, WIPO, WTO, the Paris Convention and the Berne Convention. The book serves as a platform to understand and contextualize policy discussions on topics such as public health, Internet regulation, as well as regional and bilateral trade treaties. Key features include:

- Accessible and carefully summarized overview of the field
- Comprehensive and up-to-date review of all major international intellectual property institutions and instruments
- Introduces current issues within international IP negotiations
- Provides tools to analyze the history and possible future development of international IP norms.

Students, researchers, policy makers and practitioners of intellectual property will find this book to be an invaluable resource in gaining an understanding of the international rules and context in which both domestic and international IP policy issues should be understood.

This clear and concise Advanced Introduction to National Accounting explores the post-1960 modernization of national accounting. John M. Hartwick offers insights into the arrival of Total Factor Productivity (TFP) and user cost, highlighting the importance of Tornqvist index numbers and translog production, cost and utility functions in its modernization.
