Advanced Perl Bu

To create objects in Perl

# Read Online Advanced Perl Bu

one could use many different approaches but the usual method is as follows: • create a class which means creating a module wherein the class is defined • using a (anonymous) hash to keep track of the attributes of a

# Read Online Advanced Perl Bu

given object • using subs to implement the various methods available to the object We'll construct a very simple class, a class of Rectangles with a few attributes and methods.
