The American Heart Association is pleased to announce that the official 2020 American Heart Association Guidelines for CPR & Emergency Cardiovascular Care (2020 AHA Guidelines for CPR & ECC) will be published online in the AHA’s flagship journal, *Circulation*, on Wednesday, October 21, 2020. Learn more about The Guidelines Virtual Experience.

### CPR & ECC Guidelines | American Heart Association CPR ...

The 2020 AHA Guidelines for CPR and ECC reflect the latest global resuscitation science and treatment recommendations derived from the 2020 International Consensus on CPR and ECC with Treatment Recommendations (CoSTR).

### 2020 American Heart Association Guidelines for ...

The American Heart Association’s CPR & ECC inspires the world to save lives and envisions a world where no one dies from cardiac arrest. The AHA is the leader in resuscitation science, education, and training, and publisher of the official Guidelines for CPR and ECC.

### American Heart Association CPR & First Aid

The 2020 AHA guidelines include recommendations for the care of adult patients with out-of-hospital cardiac arrest (OHCA) and in-hospital cardiac arrest (IHCA). The guidelines reaffirm cardiopulmonary resuscitation (CPR) as the hallmark of cardiac arrest management and the importance of chest compression.

### Updated AHA Guidelines for CPR and Emergency ...

guidelines. Data from the AHA’s Get With The Guidelines-Resuscitation registry show higher likelihood of ROSC when CPR quality is monitored using either ETCO<sub>2</sub> or diastolic blood pressure.

### Highlights of the 2020 American Heart Association’s ...

The new guidelines issued Wednesday by the American Heart Association provide science-based recommendations to maximize someone’s chance of surviving cardiac arrest, which occurs when the heart suddenly stops beating.

### Updated CPR guidelines address physical and emotional ...

### American Heart Association CPR Cheat Sheet

This guideline affirms the previous recommendations. The 2015 American Heart Association (AHA) Guidelines Update for Cardiopulmonary Resuscitation (CPR) and Emergency Cardiovascular Care (ECC) recommended against routine endotracheal suctioning for both vigorous and nonvigorous infants born with meconium-stained amniotic fluid (MSAF). This guideline reinforces initial steps and PPV as priorities.

### Part 5: Neonatal Resuscitation - American Heart Association

About Guidelines & Statements. The American Heart Association and American Stroke Association publish medical guidelines and scientific statements on various cardiovascular disease and stroke topics. AHA/ASA volunteer scientists and healthcare professionals write the statements.

### Guidelines & Statements - American Heart Association

In 2010, the American Heart Association (AHA) released their 2010 Guidelines Highlights, which outlines the key changes regarding CPR procedures.

### The Revised American Heart Association CPR Guidelines

The American Heart Association (AHA) issued interim cardiopulmonary resuscitation (CPR) guidelines that apply during the COVID-19 pandemic. The AHA recommended bystanders and lay rescuers administer “hands only” CPR without mouth-to-mouth ventilation to limit exposures to the SARS-CoV-2 virus that causes COVID-19.

### American Heart Association Issues COVID-19 CPR Guidelines ...

Since the first AHA Guidelines for CPR and ECC were published in 1966, the guidelines have been reviewed, updated, and published periodically by the AHA. In 2015, the process of five-year updates was transitioned to an online format that uses a continuous evidence evaluation process rather than periodic reviews.

### AHA releases 2020 AHA Guidelines for CPR and ECC – AHA CPR ...

The AHA guidelines “strongly recommend” that untrained / lay responders perform “compression-only” CPR, sometimes known as CCR. However, medical professionals and trained lay people are still urged to give the victim two “rescue breaths” in between each series of 30 chest compressions.

### CPR & First Aid - AHA Guidelines

The 2015 guidelines still recommend traditional CPR cycles of 30 chest compressions to two rescue breaths for one-rescuer CPR in all age groups and for two-rescuer CPR in adults. The 15:2 ratio of compressions to breaths remains in the 2015 guidelines for two-rescuer CPR for children and infants.

### 2015 - 2020 BLS Guideline Changes - ACLS, PALS, BLS, CPR ...
