What is your level of understanding of the many moral, ideological, and political issues that student affairs educators regularly encounter? What is your personal responsibility to addressing these issues? What are the rationales behind your decisions? What are the theoretical perspectives you might choose and why? How do your responses compare with those of colleagues? Contested Issues in Student Affairs augments traditional introductory handbooks that focus on functional areas (e.g., residence life, career services) and organizational issues. It fills a void by addressing the social, educational and moral concepts and concerns of student affairs work that transcend content areas and administrative units, such as the tensions between theory and practice, academic affairs and student affairs, risk taking and failure; and such as issues of race, ethnicity, sexual orientation, and spirituality. It places learning and social justice at the epicenter of student affairs practice. The book addresses these issues by asking 24 critical and contentious questions that go to the heart of contemporary educational practice. Intended equally for future student affairs educators in graduate preparation programs, and as reading for professional development workshops, it is designed to stimulate reflection and prompt readers to clarify their own thinking and practice as they confront the complexities of higher education. Student affairs faculty, administrators, and graduate students here situate these 24 questions historically in the professional literature, present background information and context, define key terms, summarize the diverse ideological and theoretical responses to the questions, make explicit their own perspectives and responses, discuss their political implications, and set them in the context of the changing nature of student affairs work. Each chapter is followed by a response that offers additional perspectives and complications, reminding readers of the ambiguity and complexity of many situations. Each chapter concludes with a brief annotated bibliography of seminal works that offer additional information on the topic, as well as with a URL to a moderated blog site that encourages further conversation on each topic and allows readers to teach and learn from each other, and interact with colleagues beyond their immediate campus. The website invites readers to post blogs, respond to each other, and upload relevant resources. The book aims to serve as a conversation starter to engage professionals in on-going dialogue about these complex and enduring challenges. Short Contents The 24 questions are organized into four units. I. The Philosophical Foundations of Student Affairs in Higher Education explores the implications and complications of student affair educators placing learning at the epicenter of their professional work. II. The Challenges of Promoting Learning and Development explores the challenges associated with learning-centered practice. III. Achieving Inclusive and Equitable Learning Environments addresses crafting learning environments that include students whose needs are often labeled "special," or students and/or student subcultures that are often marginalized and encouraged to adapt to normalizing expectations. IV. Organizing Student Affairs Practice for Learning and Social Justice addresses the organizational and professional implications of placing learning and social justice at the epicenter of student affairs practice.

“Gripping . . . a compelling story of personal hubris and humbling defeat.” —Jack Weatherford,author of the New York Times bestseller Genghis Khan and the Making of the Modern World In a masterful dual narrative that pits the heights of human ambition and achievement against the supremacy of nature, New York Times bestselling author Stephan Talty tells the story of a mighty ruler and a tiny microbe, antagonists whose struggle would shape the modern world. In the spring of 1812, Napoleon Bonaparte was at the height of his powers. Forty-five million called him emperor, and he commanded a nation that was the richest, most cultured, and advanced on earth. No army could stand against his impeccably trained, brilliantly led forces, and his continued sweep across Europe seemed inevitable. Early that year, bolstered by his successes, Napoleon turned his attentions toward Moscow, helming the largest invasion in human history. Surely, Tsar Alexander's outnumbered troops would crumble against this mighty foe. But another powerful and ancient enemy awaited Napoleon's men in the Russian steppes. Virulent and swift, this microscopic foe would bring the emperor to his knees. Even as the Russians retreated before him in disarray, Napoleon found his army disappearing, his frantic doctors powerless to explain what had struck down a hundred thousand soldiers. The emperor's vaunted military brilliance suddenly seemed useless, and when the Russians put their own occupied capital to the torch, the campaign became a desperate race through the frozen landscape as troops continued to die by the thousands. Through it all, with tragic heroism, Napoleon's disease-ravaged, freezing, starving men somehow rallied, again and again, to cries of “Vive l'Empereur!” Yet Talty's sweeping tale takes us far beyond the doomed heroics and bloody clashes of the battlefield. The Illustrious Dead delves deep into the origins of the pathogen that finally ended the mighty emperor's dreams of world conquest and exposes this “war plague's” hidden role throughout history. A tale of two unstoppable forces meeting on the road to Moscow in an epic clash of killer microbe and peerless army, The Illustrious Dead is a historical whodunit in which a million lives hang in the balance.

Action learning is a continued process of learning and reflection with the support of a group of colleagues, working on real issues. The action learning method is increasingly used to bring innovation to many different fields of work. The principles of action learning can achieve improvement and transformation in a wide range of applications and disciplines, including professional training and educational contexts. This book is a comprehensive guide to action learning which maintains an accessible, practical focus throughout. It is packed with useful resources, including case studies and ideas for workshop sessions. Key topics covered include: * action learning in professional and educational settings * setting up, facilitating and evaluating an action learning programme * the roles and skills required to practice successfully * use of action learning in relation to the individual, the group and the organization * the role of reflection; and action learning theory. Newcomers to the area of action learning will find this an essential introduction which can be put to use straight away, while more experienced practitioners seeking a deeper understanding will value the thorough analysis of action learning theory.
