Software Evaluation: Criteria-based Assessment

Without documentation, software is just a black box. And black boxes aren't anywhere near as useful as they could be because their inner workings are hidden from those who need them in the open. Software documentation turns your software into a glass box by explaining to users and developers how it operates or is used.

A high-level design document (HLDD) describes the architecture used in the development of a particular software product. It usually includes a diagram that depicts the envisioned structure of the software system. Since this is a high-level document, non-technical language is often used. What is in a software design document?

How to Write Software Design Documents: With Examples | Toptal

An application platform should support an application in every style, from single-user applications on a device to thousand-user applications in the cloud. Application platforms typically include the following services: an operating system, execution services (such as libraries for running software), data services, cloud services and development tools.
