The essential introduction to the principles and applications of feedback systems—now fully revised and expanded This textbook covers the mathematics needed to model, analyze, and design feedback systems. Now more user-friendly than ever, this revised and expanded edition of Feedback Systems is a one-volume resource for students and researchers in mathematics and engineering. It has applications across a range of disciplines that utilize feedback in physical, biological, information, and economic systems. Karl Åström and Richard Murray use techniques from physics, computer science, and operations research to introduce control-oriented modeling. They begin with state space tools for analysis and design, including stability of solutions, Lyapunov functions, reachability, state feedback observability, and estimators. The matrix exponential plays a central role in the analysis of linear control systems, allowing a concise development of many of the key concepts for this class of models. Åström and Murray then develop and explain tools in the frequency domain, including transfer functions, Nyquist analysis, PID control, frequency domain design, and robustness. Features a new chapter on design principles and tools, illustrating the types of problems that can be solved using feedback Includes a new chapter on fundamental limits and new material on the Routh-Hurwitz criterion and root locus plots Provides exercises at the end of every chapter Comes with an electronic solutions manual An ideal textbook for undergraduate and graduate students Indispensable for researchers seeking a self-contained resource on control theory

This edited volume presents a comprehensive and comparative view of the law of international watercourses with special reference to the issues facing the Ganges River basin. It provides an analysis of the development of international waterways law and outlines the essentials of the UN Convention on non-navigational uses of international watercourses. Focusing on relations between the three riparian states of the River Ganges and the potential for cooperation, the volume also examines the domestic legal regimes of the area and the political dimension to the issues of sharing the waters of the river. The work presents a comparative picture with an analysis of developments in the Rhine and Mekong basins, comparing developments in the legal regimes of these areas with the experience of South Asia. Presenting an up-to-date analysis of the current law and pointing the direction for future developments, this collection will be a valuable resource for academics, researchers and policy makers working in this area.
