Avoiding and Managing Implant Complications -
Decisions in ...

This is why it's crucial to get a medical examination before you move forward with dental implants procedures. Conditions such as cancer, diabetes, persistent gum disease and irradiated jaws, as well as alcoholism, smoking, medication and various other ailments all have the potential to cause dental implant problems. While this doesn't necessarily mean you won't be able to have them, it could become more difficult for the implant to anchor onto the bone or take longer to heal.
