This voltage drop principle leads to another important
law in basic electrical engineering, Kirchoff ' s Voltage
Law (KVL). This law states that the algebraic sum of
the voltages in a closed loop is always equal to zero. If
we only knew the supply potential and the voltage drop
of R1, we could use KVL to find the other voltage drop.

Step 1: Electricity. There are two types of electrical
signals , those being alternating current (AC), and
direct current (DC). With alternating current, the
direction electricity flows throughout the circuit is
constantly reversing. You may even say that it is
alternating direction.
