downward through the block on the front of the mast. Tie the loose block onto the end with another bowline. Tie one end of the second piece of line to the bridge on the halyard cleat.

## ~~Basic Opti Rigging~~

Rigging the Jib Description: The Jib is rigged with an internal forestay that is threaded through the jib luff sleeve. When the jib is hoisted the rig is supported by the internal jib forestay and not the permanent forestay. After you raise the jib, you will notice that the permanent forestay is quite loose. When not in use, the jib forestay
