14. Chapter 14: Cardiovascular System. Figure xx.1 This artist's conception of the human heart suggests a powerful engine—not inappropriate for a muscular pump that keeps the body continually supplied with blood. (credit: Patrick J. Lynch)

The human body needs blood to deliver nutrients to and remove wastes from our trillions of cells.

Chapter 14 - The Human Genome The Human Genome Project (HGP) formally began in 1990 and was finished in 2003. The goal was to discover the DNA sequences for all of the 20,000-22,000 genes that are found in human beings. This knowledge is vital for research into genetic disorders and possible genetic

Chapter 14 Mendel and the Gene Idea  
Lecture Outline . Overview: Drawing from the Deck of Genes. Every day we observe heritable variations (such as brown, green, or blue eyes) among individuals in a population. These traits are transmitted from parents to offspring. One possible explanation for heredity is a “blending” hypothesis.
