~~Engineering Biomedical Instrumentation And Measurements~~

Biomedical instrumentation provides the tools by which these measurements can be achieved. In later chapters each of the major forms of biomedical instrument covered in detail, along with the physiological basis for the measurement. The physiological measurements themselves are summarized in Appendix B, which also includes such information as amplitude and frequency variables.

"Biomedical instruments" refer to a very broad class of devices and systems. A biomedical instrument is an ECG machine to many people. To others, it's a chemical biosensor, and to some it's a medical imaging system. Current estimates place the worldwide market for biomedical instruments at over \$200 billion.
