Bodie, Kane, and Marcus Investments 9th Edition Hirt and Block Fundamentals of Investment Management 9th Edition Jordan and Miller Fundamentals of Investments: Valuation and Management Sixth Edition Stewart, Piroos, and Hiesler Running Money: Professional Portfolio Management 6th Edition ...

Bodie/Kane/Marcus is the leading textbook in the graduate investments market. It is recognized as the best blend of practical and theoretical coverage, while maintaining an appropriate rigor and clear writing style. Its unifying theme is that security markets are nearly efficient, meaning that most securities are usually priced appropriately given their risk and return attributes. The text places greater emphasis on asset allocation, and offers a much broader and deeper treatment of futures, options, and other derivative security markets than most investment texts.

A New York Times bestseller and one of the Ten Best Business Books of 2013 by WealthManagement.com, this book brings a new vision of the value of debt in the management of individual and family wealth In this groundbreaking book, author Tom Anderson argues that, despite the reflex aversion most people have to debt—an aversion that is vociferously preached by most personal finance authors—wealthy individuals and families, as well as their financial advisors, have

everything to gain and nothing to lose by learning to think holistically about debt. Anderson explains why, if strategically deployed, debt can be of enormous long-term benefit in the management of individual and family wealth. More importantly, he schools you in time-tested strategies for using debt to steadily build wealth, to generate tax-efficient retirement income, to provide a reliable source of funds in times of crisis and financial setback, and more. Takes a "strategic debt" approach to personal wealth management, emphasizing the need to appreciate the value of "indebted strengths" and for acquiring the tools needed to take advantage of those strengths. Addresses how to determine your optimal debt ratio, or your debt "sweet spot" A companion website contains a proprietary tool for calculating your own optimal debt ratio, which enables you to develop a personal wealth balance sheet. Offering a bold new vision of debt as a strategic asset in the management of individual and family wealth, *The Value of Debt* is an important resource for financial advisors, wealthy families, family offices, and professional investors.

The market leading undergraduate investments textbook, *Essentials of Investments*, 8e by Bodie, Kane and Marcus, emphasizes asset allocation while presenting the practical applications of investment theory. The authors have eliminated unnecessary mathematical detail and concentrate on the intuition and insights that will be useful to practitioners throughout their careers as new ideas and challenges emerge from the financial marketplace. The eighth edition has been fully updated to reflect the recent financial crisis and includes a new chapter on Hedge Funds.

We are pleased to present this Global Edition, which has been developed specifically to meet the needs of international investment students. A market leader in the field, this text introduces major issues of concern to all investors and places emphasis on asset allocation. It gives students the skills to conduct a sophisticated assessment of watershed current issues and debates. Bodie Investments' blend of practical and theoretical coverage combines with a complete digital solution to help your students achieve higher outcomes in the course.

A thematic textbook on investment analysis, treating all topics within a common framework holding that security markets are nearly efficient, meaning most securities are usually priced appropriately given their risk and return attributes. Suitable for a one- or a two-course sequence in investments. Annotation copyrighted by Book News, Inc., Portland, OR

This manual provides detailed solutions to the end-of-chapter problem sets.

"CAIA Association has developed two examinations that are used to certify Chartered Alternative Investment Analysts. The Level I curriculum builds a foundation in both traditional and alternative investment markets--for example, the range of statistics that are used to define investment performance as well as the many types of hedge fund strategies. The readings for the Level II exam focus on the same strategies, but change the context to one of risk management and portfolio optimization. Level I CAIA exam takers have to work through an outline of terms, be able to identify and describe aspects of financial markets, develop reasoning skills, and in some cases make computations necessary to solve business problems"--

*Financial Economics, Risk and Information* presents the fundamentals of finance in static and dynamic frameworks with focus on risk and information. The objective of this book is to introduce undergraduate and first-year graduate students to the methods and solutions of the main problems in finance theory relating to the economics of uncertainty and information. The main goal of the second edition is to make the materials more accessible to a wider audience of students and finance professionals. The focus is on developing a core body of theory that will provide the student with a solid intellectual foundation for more advanced topics and methods. The new edition has streamlined chapters and topics, with new sections on portfolio choice under alternative information structures. The starting point is the traditional mean-variance approach, followed by portfolio choice from first principles. The topics are extended to alternative market structures, alternative contractual arrangements and agency, dynamic stochastic general equilibrium in discrete and continuous time, attitudes towards risk and towards inter-temporal substitution in discrete and continuous time; and option pricing. In general, the book presents a balanced introduction to the use of stochastic methods in discrete and continuous time in the field of financial economics.
