After some dreadful years for Sierra skiers, the snow is back and the pent-up demand to ride it is satisfied by this book! From Bishop to Tahoe to Shasta, and multiple slopes in between, California has a big ski and snowboard culture and this backcountry guide describes 97 of the state's best routes. Part of our critically-acclaimed series, Backcountry Ski & Snowboard Routes: California is written by Tahoe-based professional skier, Jeremy Benson, and covers the best of the state, featuring advanced backcountry descents with serious verticals. The northern region of the book focuses on Mount Shasta and Tahoe, while the central region includes Mammoth, Bishop, and Sierra Club hut trips, and to the south, 14ers Mount Whitney and Mount Langley and more.

The best backcountry skiing in the Eastern Sierra is centered on the town of Mammoth Lakes, and Dan and Nate have made sure that nothing is left out of the broad area covered in the book, extending from Tioga Pass in the north to Bishop Creek in the south. From the backyard runs on the Mammoth Crest to the roadside accessible Tioga Pass, and the epic wilderness peaks like Mt. Tom and Laurel Mountain, this guide serves as both the ultimate introductory resource and the experienced hard-man's hit list. The book is printed in color, 240 pages, and packed with useful information. It includes scores of annotated color topographic maps and hundreds of color photographs. The authors give a written description for each approach and descent along with useful statistics for gauging conditions and seriousness, including the slope, aspect, and angle, vertical gained and mileage of the approach, and a seriousness rating.

Each book includes: Up-to-date trail descriptions with mile-by-mile directional cues Detailed trail maps and GPS coordinates Difficulty ratings and average hiking times A Trail Finder for the best hikes with dogs, with children, for great views, or for wildlife viewing Information on fees and permits, contacts, attractions, restaurants, accommodations, and canine compatibility Leave No Trace and wilderness safety tips and techniques Many with full-color maps and photos!

The White-Inyo Range--rising sharply from the eastern edge of Owens Valley--is one of the most extraordinary landscapes in the world. High, dry, and amazingly diverse, it boasts an expansive alpine tundra and features the oldest living species on earth--the 4,000-year-old Bristlecone Pines. This colorful and authoritative volume assembles a wealth of information of deep interest to the hikers and scientists attracted to White-Inyo's altitude and isolation. The nearly two dozen contributors to the volume are leading experts on the flora and fauna, the geology, geomorphology, meteorology, anthropology, and archaeology of the area. The book

offers descriptions of more than 650 kinds of living organisms, from the handful of fish to the abundance of reptile, amphibian, bird and plant species. (It provides descriptions of hundreds of flowering plants.) It contains an 8-color geologic map and a roadside guide that enables the visitor to make sense of the area's complex geological history. Readers will also learn about air currents that make the range a delight for sailplane pilots and create strange cloud formations. And a special chapter tells what is known of the Native Americans who moved up and down the mountain slopes in response to seasonal changes. For anyone who wishes to visit this astonishing area or to do research there, this volume will be a unique, comprehensive resource. The godfather of North Cascades climbing updates the third of his seminal guides to this wild range. Included are 10 new topos, updated maps, over 100 photographs (75 with route overlays), route information and driving directions. Hikers, scramblers, serious climbers and Northwest rescue organizations, alike, have relied on Fred Beckey's Cascade Alpine Guides for decades to lead them through this wild mountain range. In addition to their comprehensiveness, the books provide a rare combination of aerial photos with route overlays, three-dimensional illustrated maps and climbing topos. The section of the North Cascades covered in this volume is roughly a pie-shaped area bounded by Hwy 97 and the Columbia River to the east, Lake Chelan to the west, and Hwy 20 to the north. Except for glaciers and some year-round snow fields, it's mostly dry, lonesome, open country, with beautiful granite spires jutting to the sky.

**Rock Climbing:** The AMGA Single Pitch Manual is intended to serve as a textbook for past and future participants of the AMGA SPI program. The book more specifically address the needs of the professional climbing instructor and advanced recreational climbers. It presents the most current, internationally recognized standards for technical climbing systems used in single pitch rock terrain. Included are chapters on effective teaching in the outdoor environment, risk management, professionalism, environmental awareness, and rescue
