In adult cardiac surgery, three valves are commonly repaired or replaced: the aortic, mitral and tricuspid valves. Aortic Valve. The aortic valve sits at the outlet of the heart at the base of the major blood vessel called the aorta. This valve opens when the heart pumps, to let the blood out, and then closes as the heart refills, to prevent the blood from flowing back from the aorta into the ...

Adult Cardiac Surgery includes all procedures performed on patients aged 18 or over that involve the heart or structures attached to the heart. For the purposes of the Audit these operations involve opening the chest wall and usually the pericardium (the sac around the heart). The most common of these procedures are Coronary Artery Bypass Grafts (CABG), Valve surgery and Aortic surgery.

The STS Adult Cardiac Surgery Database (ACSD) is the world's premier clinical outcomes registry for adult cardiac surgery. Launched in 1989, the Database contains more than 6.5 million cardiac surgery procedure records and currently has nearly 3,800 participating physicians, including surgeons and anesthesiologists.

Adult Cardiac Surgery Database | STS

The cardiac surgery fellow should be notified early if potential tamponade is suspected. Volume resuscitation, inotropes, and vasopressors are temporizing measures only in this situation. If a patient with suspected tamponade suddenly deteriorates and develops PEA (pulseless electrical activity) an urgent sternotomy should be done in the ICU. This should only be done by the Cardiac Surgeon or ...

Cardiac Surgery in the Adult by Edmunds - AbeBooks

In summary, this is the first European publication presenting guidelines for the conduct of CPB during adult cardiac surgery. Due to the lack of scientific evidence for some topics in this field, many recommendations were based on expert consensus, and it is therefore inevitable to call for more thorough, well-thought-out and well-conducted scientific research in many aspects of CPB. 2 ...
