~~Respiration Breaking Down Energy~~

Cellular respiration is the process by which living cells break down glucose

# Online Library Cellular Respiration Breaking Down

Energy Weekly molecules and release energy. The process is similar to burning, although it doesn't produce light or intense heat as a campfire does. This is because cellular respiration releases the energy in glucose slowly, in many small steps.

# Online Library Cellular Respiration Breaking Down

## 5.9: Cellular Respiration — Biology LibreTexts

The first two, glycolysis and the Krebs cycle, break down food molecules. The third pathway, oxidative phosphorylation, transfers the energy from the food molecules to ATP. Here are the basics of how cellular

# Online Library Cellular Respiration Breaking Down

respiration works: During glycolysis, which occurs in the cytoplasm of the cell, cells break glucose down into pyruvate, a three-carbon compound. After glycolysis, pyruvate is broken down into a two-carbon molecule called acetyl-coA.
