Cash Flows; Look at all incremental cash flows occurring as a result of the project. Initial outlay; Differential Cash Flows over the life of the project (also referred to as annual cash flows). Terminal Cash Flows; 11 Capital Budgeting Steps. 1) Evaluate Cash Flows; Terminal Cash flow. Initial outlay. Annual Cash Flows. 12

Chapter 10 - Cash Flows and Other Topics in Capital Budgeting
Steps to capital budgeting 4. Find $NPV = \text{present value of future cash inflow} - \text{initial cost}$. 5. Accept if $NPV > 0$. (For a normal project, we can also accept if $IRR > WACC$.) What is the difference between independent and mutually exclusive projects? Independent projects – if the cash flows of one are unaffected by the acceptance of the other.

Chapter 10 Capital Budgeting

Since capital budgeting projects are long-term investments, the cash flows which they generate are likely to take place years into the future. If a firm spends \$1000 today and receives back \$100 per year over the next 10 years, they have not broken even. Instead, the project has caused a significant reduction in firm value.

Capital Budgeting. The process of making capital expenditure decisions is known as capital budgeting. The three most commonly used capital budgeting techniques are (a) annual rate of return, (b) cash payback, and (c) discounted cash flow. Annual Rate of Return. The annual rate of return technique is based on accounting data.
