~~bio chapter 11 evolution Flashcards and Study Sets | Quizlet~~

The theory of evolution explains how life diversified after its origin and does not address the origin of life itself. Replicators A, B, C, and D become encapsulated by a membrane of fatty acids they produced. Building the membrane resulted in a great metabolic cost. The new membrane provides limited control over the new microenvironment, is fairly permeable, and frequently allows unneeded substances in while allowing newly made molecules to dissipate into the environment.
