renaissance chapter 17 Flashcards and Study Sets | Quizlet

KEY IDEA The European Renaissance, a rebirth of learning and the arts, began in Italy in the 1300s. The years 1300 to 1600 saw a rebirth of learning and culture in Europe. Called the Renaissance, it spread north from Italy. It began there for three reasons. First, Italy had several important cities, whereas most of northern Europe was still rural.

In dialogues with three celestial ladies, Reason, Rectitude, and Justice, Christine de Pizan (1365-ca. 1429) builds an allegorical fortified city for women using examples of the important contributions women have made to Western Civilization and arguments that prove their intellectual and moral equality to men. Earl Jeffrey Richards' acclaimed translation is used nationwide in the most eminent colleges and universities in America, from Columbia to Stanford.

Festival culture is an area which has attracted increasing interest in the field of Renaissance studies in recent years. In part the outcome of scholars' focus on the place of the city in the establishment and dissemination of common culture, the attention paid to festivals also arises from the interdisciplinary nature of the topic, which reaches across the usual demarcation lines between disciplines such as cultural, political and economic history, literature, and the visual and performing arts. The scholars contributing to this volume include representatives from all these disciplines. Their essays explore common themes in festival culture across Renaissance Europe, including the use of festival in political self-fashioning and the construction of a national self-image. Moreover, in their detailed examination of particular types of festival, they challenge generalizations and demonstrate the degree to which these events were influenced the personality of the prince, the sources of funding for the ceremony, and the role of festival managers. Usually perceived as binding forces promoting social cohesion, festivals held the potential for discord, as some of the essays here reveal. Examining a wide range of festivals including coronations, triumphal entries, funerals and courtly spectacles, this volume provides a more inclusive understanding than hitherto of festivals and their role in European Renaissance culture.

Publisher Description

This pioneering study approaches the new printed-book industry in Renaissance Italy from the perspective of its publishers and booksellers, analyzing their responses to the challenges of production and their creative approaches to the distribution and sale of their merchandise.

This book investigates the importance of printing in early-modern Central Europe, revealing a complicated web of connections linking printers and scholars, Jews and Christians, from the Baltic to the Adriatic.

With an interdisciplinary approach that encompasses the history of ideas, political history, cultural history and art history, this volume, in the successful Routledge Worlds series, offers a sweeping survey of Europe in the Renaissance, from the late thirteenth to early seventeenth centuries, and shows how the Renaissance laid key foundations for many aspects of the modern world. Collating thirty-four essays from the field's leading scholars, John Jeffries Martin shows that this period of rapid and complex change resulted from a convergence of a new set of social, economic and technological forces alongside a cluster of interrelated practices including painting, sculpture, humanism and science, in which the elites engaged. Unique in its balance of emphasis on elite and popular culture, on humanism and society, and on women as well as men, *The Renaissance World* grapples with issues as diverse as Renaissance patronage and the development of the slave trade. Beginning with a section on the antecedents of the Renaissance world, and ending with its lasting influence, this book is an invaluable read, which students and scholars of history and the Renaissance will dip into again and again.

Lucid, readable textbook on one of the most important topics in European history, the Renaissance.

A Companion to the Spanish Renaissance makes a renewed case for the inclusion of Spain within broader European Renaissance movements. This interdisciplinary volume offers a snapshot of the best new work being done in this area

This collection of articles presents cutting-edge scholarship in Hippocratic studies in English from an international range of experts. It pays special attention to the commentary tradition, notably in Syriac and Arabic, and its relevance to the constitution and interpretation of works in the Hippocratic Corpus.
