Ms. Wilson's Math Classes

In proportion, if two sets of given numbers are increasing or decreasing in the same ratio, then the ratios are said to be directly proportional to each other. For example, the time taken by train to cover 100km per hour is equal to the time

Bookmark File

PDF Chapter 5

taken by it to cover the distance of 500km for 5 hours.

5.1 Ratios and

Proportions In this

section we extend the

idea of equivalent

fractions, converting

fractions to decimals,

and equations. Recall

that two fractions are

equivalent (or equal) if

they both have the

same decimal form.

For example, the

Bookmark File

PDF Chapter 5

fractions $\frac{3}{4}$ and $\frac{12}{16}$

are equivalent, since they both have a decimal form of

0.75.
