monographs of Chinese crude drugs and the prepared slices. Vegetable oil/fat and its extract, the patented Chinese traditional medicines, single ingredient of Chinese crude drug preparations etc. it has 2165 monographs with 1019 new admissions (439 articles of the prepared slice) and 634 revised; Volume II deals with monographs of chemical drugs, antibiotics, biochemical preparations, radiopharmaceuticals and excipients for pharmaceutical use, contains 2271 monographs with 330 new admissions and 1500 revised; Volume III contains biological products, has 131 monographs with 37 new admissions and 94 revised

This standard specifies the product classification, labeling and materials, requirements, test methods, inspection rules, packaging, markings and instructions for use and storage of medical suture needles. This standard applies to medical suture needles used to suture internal organs, soft tissues, skin, etc.

After the successful introduction of acupuncture to the West, recent advances in analytical methods in chemistry, molecular biology and systems biology - especially the development of the "omic" technologies - have again brought Chinese drugs into the focus of research on Traditional Chinese Medicine (TCM). With more than 1000 publications on the chemistry, molecular biology and

Edition 2 Appendix

pharmacology of TCM drugs in international journals over the last 10 years, Chinese drugs are gaining increasingly reputation and impact. These data offer great opportunities for the development of new pharmaceuticals for various clinical applications.

International scientists have compiled relevant and trend setting research results in this book. Topics range from the latest methods of quality and safety assurance by chemical and genetic fingerprints to the development of new pharmaceuticals for a future evidence-based therapy e.g. for cancer, cardiovascular, inflammatory or infectious diseases as well as to recent experimental results on multitarget and synergy research for the preparation of multi-extract-pharmaceuticals from TCM.

This book reviews research on Dan Shen, compiles data from clinical trials and biological experiments, and summarizes the latest research advances. It covers the medicinal herb, herbal pieces, and new proprietary drugs that contain it; it also covers simple and compound, traditional and contemporary formulas, and addresses a broad range of subjects, including: standardized cultivation; biodiversity; effective substances and their biological activities; quality control; and clinical trials. The book goes on to present the clinical trials on Dantonin, especially focusing on its therapeutic effects for coronary heart

Edition 2 Appendix

disease. It discusses compound prescriptions and compatibilities, from the herbal piece level to composition level, and describes approaches to research on modern Chinese medicine. Volume 1 describes the biology and chemistry of Dan Shen, while Volume 2 focuses on pharmacology and quality control. Volume 3 describes the clinical research on Dan Shen. Editor Xijun Yan is the President of Tianjin Tasly Group and a Member of the TCM Standardization Technical Committee. Gathering contributions from more than 100 authors working in the field of pharmaceutical and clinical research, the book presents and analyzes the available information from multiple aspects, reflects the current status of Dan Shen research, and offers an essential reference work for further research and development.

This Part of GB/T 14233 specifies the biological test methods of medical infusion, transfusion and injection equipment. This Part is applicable to medical infusion, transfusion and injection equipment.

This standard applies to the foil that is compositely made of medicinal polyvinyl chloride (PVC), aluminum (Al), and polyamide (PA) through an adhesives. It applies to solid medicines (tablets, capsules, suppositories, etc.) that is packaged with blister packs by cold-form.

Edition 2 Appendix

This standard specifies the technical requirements, inspection methods, inspection rules, marking, inspection certificate and instruction manual, packaging, transportation and storage of molybdenum 99-Technetium 99m chromatographic generator (fission).

This Standard specifies the classification, requirements, inspection rules, marks and packaging of medical sodium hyaluronate gel. This Standard is applicable to medical sodium hyaluronate gel. The application of medical sodium hyaluronate gel includes viscoelastic agents for eye surgery, lubricants for intra-articular injection and barriers for surgical operation.

This second volume offers numerous approaches to using Chinese medicine for the prevention and treatment of various diseases in medical practice. It brings the concepts and theories learned in the first volume and applies them in clinical settings with real patient examples. It goes over the four natures and five flavors of herbal drugs, and covers the different techniques of acupuncture. The book considers how the advancements in modern technology have shaped Traditional Chinese Medicine (TCM), and discusses the revolutionary innovations that are occurring in the Chinese medicine industry today and how they will shape the future.
