Cisco Bug: CSCvw25846 - Doc Enhancement - Admin guide says ...
To log into the Cisco TMS web application, users must have a Windows username and password that the server is configured to trust. By default, any local Windows user account will work, as well as any Active Directory domain user account if the server is a member of an Active Directory domain. The first user to sign into Cisco TMS is automatically made an administrator and will have full access to Cisco TMS . br Oleksandr

Integration of TMS and CUCM Hi

Arun, For integrating TMS (13.1) with CUCM (8.6) refer to the TMS

13.1 Administrator Guide page 12, section Adding Cisco Unified CM and CTS to Cisco TMS URL for TMS 13.1 admin guide - http://www.cisco.com/en/US/docs/telepresence/infrastructure/tms/admin_guide/Cisco_TMS_Admin_Guide_13-1.pdf

Integration of TMS and CUCM - Cisco Community

When you import a group into TMS, it will initially start with no users, only after a user logs into TMS will the AD group start to contain users. The "Update Groups From AD" option, only updates AD group memberships for all users that already have accounts added in TMS.

TMS consists of 3 parts: a database, a front-end and a few services. All of these can be checked in one single

line: `curl -k --ntlm --user`

`username:password https://TMS_IP/tms/default.aspx?pagelid=114`. In return (if TMS is up of course), you'll get the html code of the TMS Server

Maintenance page in which you can parse TMS services status.

Cisco Tms Admin Guide - amsterdam2018.pvda.nl
Cisco TelePresence Management Suite (TMS) software implements a Simple Object Access Protocol (SOAP) interface that by design allows unauthenticated access to web services designed to provide management features to devices. At first publication of the advisory, the management feature was not documented and may have represented unknown risks to

customers implementing the feature within their environments.

Cisco TelePresence Management Suite Web Services

I found in the TMS admin guide about distribution routing (least cost routing and best impression) but I'm not sure this feature meet the above requirement. The admin guide also said "Using different models of MCU in a cascade when manually configuring cascading is not supported in Cisco TMS"
