If you are a skilled Java programmer but are concerned about the Java coding interview process, this real-world guide can help you land your next position. Java is a popular and powerful language that is a virtual requirement for businesses making use of IT in their daily operations. For Java programmers, this reality offers job security and a wealth of employment opportunities. But that perfect Java coding job won't be available if you can't ace the interview. If you are a Java programmer concerned about interviewing, *Java Programming Interviews Exposed* is a great resource to prepare for your next opportunity. Author Noel Markham is both an experienced Java developer and interviewer, and has loaded his book with real examples from interviews he has conducted. Review over 150 real-world Java interview questions you are likely to encounter. Prepare for personality-based interviews as well as highly technical interviews. Explore related topics, such as middleware frameworks and server technologies. Make use of chapters individually for topic-specific help. Use the appendix for tips on Scala and Groovy, two other languages that run on JVMs. Veterans of the IT employment space know that interviewing for a Java programming position isn't as simple as sitting down and answering questions. The technical coding portion of the interview can be akin to a difficult puzzle or an interrogation. With *Java Programming Interviews Exposed*, skilled Java coders can prepare themselves for this daunting process and better arm themselves with the knowledge and interviewing skills necessary to succeed.

Chapter Guide Part One: Soft Skills and Process Introduction The Interview Process Creating your resume Phone Interviews Face to face interviews Technical Tests Tell me about your system Part Two: Core Java Object Oriented Programming Data Structures Java Exceptions JVM and Garbage Collection Threading Big O Notation A Note From The Author Hi, I'm Sam. I'm a senior Java developer and have been interviewing candidates for over 7 years across various financial institutions and smaller firms. Having gone through hundreds of CVs and candidates during a recent recruitment drive I was really shocked at how many candidates didn't even do basic preparation. It was immensely frustrating how many people could have done better if they'd just spent the time to revise their Java knowledge and practice their soft skills. Interviews are hard. I should know, I've interviewed hundreds of developers and many fail the interview (even the awesome coders). I looked online to discover that the limited material available was fragmented and poor in quality. As a result I wrote Java Interview Bootcamp- this is my guide on how to ace Java interviews based on my experience from both sides of the desk.
