world context from both a firm and investor perspective. The focus of this text is on traditional theory applied to a holistic business case study, offering readers both a quantitative and qualitative perspective on such topics as capital budgeting, time value of money, corporate risk, and capital structure. Each section in the book corresponds to the order in which a business makes key financial decisions—as opposed to level of difficulty—allowing readers to grasp a comprehensive understanding of the corporate financial life cycle. Directly addressing the area of corporate finance in an applied setting, and featuring numerous case examples and end-of-chapter discussion questions and problems, this textbook will appeal to advanced undergraduates majoring in finance, graduate-level students, as well as professionals in need of a quick refresher on corporate financial policy.
