Answer Of B  
Set Intersection:

Kolman  
The intersection of  
sets A and B

Chusky  
(denoted by  $A \cap B$ ) is  
the set of elements  
which are in both A  
and B. Hence,

$A \cap B = \{x | x \in A \text{ AND } x \in B\}$ . The set

difference of sets A  
and B (denoted by  
 $A - B$ ) is the set of

Answers

Q.131 If A and B are two subsets of a universal set then prove that C

# Read Book

## Discrete

$A - B = A \cap B$  Ans: In

order to prove this

let  $x$  be any

element of  $(A - B)$

then  $x \in A - B \implies x \in$

$A$  and  $x \notin B$   $C \implies x \in$

$A$  and  $x \notin B \implies x \in A$

$\cap B$  This implies

that  $C \subseteq A - B \subseteq A \cap B$

and  $C \subseteq A \cap B \subseteq A - B$

Thus  $A - B = A \cap B$
