Local history of East Belfast

This collection of critical essays finds itself at the intersection of cultural, literary and film studies, and explores the various ways in which dysfunction is expressed in Irish studies. Dysfunction can be regarded as part and parcel of a portrayal of a landscape of trauma and crisis that may have been traditionally repressed in Ireland at large. However, dysfunction also envisages mediation, managing, transcending and healing. As such, this volume examines how Ireland tackles dysfunction at large, but more importantly, how mediation, managing, healing and transcending help in the understanding of the ever-changing and on-going process of the construction of an Irish identity today; sometimes looking back at the past, but always creating the need of inventing new ways to understand the future of Ireland. The collection presents essays which tackle dysfunction from different and multifarious perspectives that range from sociological, historical and literary discourses to more contemporary insights into dysfunction in today's Ireland. It encompasses theory and analysis and includes the works of both senior academics and emerging scholars, as well as those outside academia.

In Northern Ireland, a once seemingly intractable conflict is in a state of transformation. Lee A. Smithey offers a grassroots view of that transformation, drawing on interviews, documentary evidence, and extensive field research. He offers essential models for how ethnic and communal-based conflicts can shift from violent confrontation toward peaceful co-existence. Smithey focuses particularly on Protestant unionists and loyalists in Northern Ireland, who maintain varying degrees of commitment to the Protestant faith, the Crown, and and Ulster / British identity. He argues that antagonistic collective identities in ethnopolitical conflict can become less polarizing as partisans adopt new conflict strategies and means of expressing identity. Consequently, the close relationship between collective identity and collective action is a crucial element of conflict transformation. Smithey closely examines attempts in ProtestantUnionistloyalist communities and organizations to develop more constructive means of expressing collective identity and pursuing political agendas that can help improve community relations. Key leaders and activists have begun to reframe shared narratives and identities, making possible community support for negotiations, demilitarization, and political cooperation, while also diminishing out-group polarization. As Smithey shows, this kind of shift in strategy and collective vision is the heart of conflict transformation, and the challenges and opportunities faced by grassroots unionists and loyalists in Northern Ireland can prove instructive for other regions of intractable conflict.
