Providing complete, step-by-step coverage of the Edexcel GCE Physics specification, this is the official Student Book for the concept-led approach to the specification. Written by experienced examiners, it offers students motivating and relevant content to improve exam performance and ensure students fulfil their full potential. *Allows for regular testing and exam preparation with real Edexcel past questions, provided in the 'Examzone' sections. *Supports independent learning through a range of additional resources provided on the ActiveBook CD-ROM, included FREE in the back of each book. *Helps students build a wide range of skills, including data analysis, critical evaluation of information, communication and collaborative work. *Gives students an in-depth, scientific understanding of the principles covered in each topic, including How Science Works. *Helps students easily see how content from the specification is covered through topic overview maps. *Written by highly respected and experienced authors.

Exam Board: Edexcel Level: AS/A-level Subject: Physics First Teaching: September 2015 First Exam: June 2016 Endorsed by Edexcel Help students to build and develop the essential knowledge and skills needed, provide practical assessment guidance and plenty of support for the new mathematical requirements with this Edexcel Year 1 Student Book. - Supports practical assessment with Practical Skill summaries throughout - Provides support for all 16 required practicals with detailed explanations, data and exam style questions for students to answer - Builds understanding and knowledge with a variety of questions to engage and challenge students throughout the course: prior knowledge, worked examples, Test Yourself and Exam Practice Questions - Acts as an aid for the mathematical requirements of the course with worked examples of calculations and a dedicated 'Maths in Physics' chapter - Develop understanding and enable self- and peer-assessment with free online access to 'Test yourself' answers. Edexcel A level Physics Student Book 1 includes AS level.

Edexcel's own resources for the GCE 2008 specifications.

Edexcel AS/A level Physics Student Book 1.

Edexcel A level Physics Student Book 2.

Exam Board: Edexcel Level: AS/A-level Subject: Physics First Teaching: September 2016 First Exam: June 2017 Endorsed for Edexcel Help students to build and develop the essential knowledge and skills needed, provide practical assessment guidance and plenty of support for the new mathematical requirements with this Edexcel Year 2 Student Book - Supports practical assessment with Practical Skill summaries throughout - Provides support for all 16 required practicals with detailed explanations, data and exam style questions for students to answer - Builds understanding and knowledge with a variety of questions to engage and challenge students throughout the course: prior knowledge, worked examples, Test Yourself and Exam Practice Questions - Acts as an aid for the mathematical requirements of the course with worked examples of calculations and a dedicated 'Maths in Physics' chapter - Develops understanding with free online access to Test yourself Answers.

This series has been developed specifically for the Cambridge International AS & A Level Mathematics (9709) syllabus to be examined from 2020. Cambridge International AS & A Level Mathematics: Pure Mathematics 1 matches the corresponding unit of the syllabus, with a clear and logical progression through. It contains materials on topics such as quadratics, functions, coordinate geometry, circular measure, series, differentiation and integration. This coursebook contains a variety of features including recap sections for students to check their prior knowledge, detailed explanations and worked examples, end-of-chapter and cross-topic review exercises and 'Explore' tasks to encourage deeper thinking around mathematical concepts. Answers to coursebook questions are at the back of the book.

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. A UNIQUE NEW APPROACH THAT'S LIKE A LIGHTNING BOLT TO THE BRAIN You know that moment when you feel as though a lightning bolt has hit you because you finally get something? That's how this book will make you react. (We hope!) Each chapter makes sure that what you really need to know is clear right off the bat and sees to it that you build on this knowledge. Where other books ask you to memorize stuff, we're going to show you the most know ideas that will guide you toward success in physics. You will start each chapter learning what the most know ideas behind a physics subject are, and these concepts will help you solve the physics problems that you find in your classwork and on exams. Dive into this book and find: • 250+ practice questions that mirror what you will find in your classwork and on exams • A bonus app with 100+ flashcards that will reinforce what you've learned • Extensive examples that drive home essential concepts • An easy-access setup that allows you to jump in and out of subjects • Physics topics aligned to national and state education standards • Special help for more challenging physics subjects, including electromagnetism, projectile motion, and energy transfer. We're confident that the most know ideas in this book will have you up and solving physics problems in no time—or at least in a reasonable amount of time!

The year is 2089, and technologists have developed a system for remotely tapping into the optic and auditory nerves of all humans. Everything that people see and hear is detected and published publicly online; nothing can be secret. It is the ultimate surveillance society. After the devastating Times of Malthus though, that's what the people wanted – we chose to be watched at all times. Jack Smith, one of the surveillance monitors, blows up the old GCHQ building in Cheltenham, destroying the surveillance computers. He goes on the run across post-apocalyptic Gloucestershire, with old friend Vicky Truva. The two are chased by a ragtag posse, including Vicky's brothers, intent on bringing the apparent revolutionaries to justice. However, the fugitives have the advantage that the information and surveillance network is down. Can Jack and Vicky evade capture, and survive hunger and thirst on the River Severn, for long enough that the people will realise how much better their lives are without the surveillance? Or will they be caught and convicted as the worst terrorists in fifty years?
