It can then be shown that the ordered pairs (a, b) and (a', b') are equal if and only if $a = a'$ and $b = b'$. This is the fundamental property of ordered pairs.) Thus if $A = \{1, 2, 3\}$ and $B = \{4, 5\}$, then the set $A \times B$ is the set whose elements are the ordered pairs $(1,4), (1,5), (2,4), (2,5),$

2 Bartle and Sherbert

Conversely, if x is in $(A \setminus B) \cap (A \setminus C)$, then $x \in A \setminus B$ or $x \in A \setminus C$. Thus $x \in A$ and either $x \notin B$ or $x \notin C$, which implies that $x \in A$ but $x \notin B \cap C$, so that $x \in A \setminus (B \cap C)$. Thus $(A \setminus B) \cap (A \setminus C) \subseteq A \setminus (B \cap C)$. Since the sets $A \setminus (B \cap C)$ and $(A \setminus B) \cap (A \setminus C)$ contain the same elements, they
