"The Unheavenly Chorus is classic Schlozman, Verba, and Brady: a timely, deeply researched examination of participatory inequalities in American civic life. Ranging broadly from interest groups to voting to protests and social movements, the authors use their combined decades of research and reflection to paint a powerful and revealing picture of the landscape of citizen involvement in politics--and the stark tilt of that landscape toward those at the top of the economic ladder. Essential reading."--Jacob S. Hacker, coauthor of Winner-Take-All Politics: How Washington Made the Rich Richer--and Turned Its Back on the Middle Class "The Unheavenly Chorus is the definitive study of participatory inequality in America. Marshaling prodigious evidence, the authors show how money not only buys influence directly but also affects associations that are supposed to be democratic antidotes to concentrated wealth. A monumental achievement of careful scholarship, this book offers real knowledge of how politics actually operates."--Robert Kuttner, coeditor, The American Prospect "Here, finally, is the analysis we've been waiting for. With extraordinary rigor and utmost care, three of the nation's most eminent political scientists show beyond a doubt how participation in American politics is inextricably linked to income and education. The most affluent and best-educated citizens are consistently overrepresented, which threatens the core democratic principle of equal responsiveness to all. This is a masterful work, certain to be a classic."--Robert Reich, University of California, Berkeley "This book is one of a kind. It represents a major statement about the current state of American democracy, political participation, social class, and social inequality. The Unheavenly Chorus gives overwhelming evidence that something is wrong with our political system and needs to be fixed. I believe this is one of the most important books of the decade."--Frank R. Baumgartner, coauthor of Agendas and Instability in American Politics "What the authors have done here is to write a book about both majoritarian and pluralist democracy--and the shortcomings of each. They forcefully convey that our democracy is ill and that the statistics they've assembled are not abstractions but represent inequality of opportunity in everyday life. In its own dignified and scholarly way, The Unheavenly Chorus voices outrage."--Jeffrey M. Berry, coeditor of The Oxford Handbook of American Political Parties and Interest Groups "The Unheavenly Chorus is a tour de force. It attacks a timely yet timeless set of issues that are critical to understanding the extent of--and possibilities for--democratic governance and political equality. Instead of a heavenly chorus, the authors find a cacophony of deep, enduring, and cumulative inequalities of political voice."--Dara Z. Strolovitch, author of Affirmative Advocacy: Race, Class, and Gender in Interest Group Politics

The empowering new 3-step guide to combining work and life strategically, creatively, and successfully. The message is simple: Work doesn't have to be all or nothing. There are countless combinations of balancing work and life between these extremes. People can establish boundaries and change the way work fits into their lives, in a way that's good for employees and employers. Work+Life provides the tools to adjust the "work" portion of life in order to have more time and/or energy for personal responsibilities and interests. Even a small change can make a big difference. Industry expert Cali Yost has been working with people on all sides of the issue: employees and managers at companies such as General Electric/NBC, Ortho-McNeil Pharmaceuticals, and Ernst & Young, and EAPs nationwide that help companies help their employees. They all say the same thing--Work+Life is the missing piece of the puzzle, providing readers with invaluable work life balance tips and putting them on the cutting edge of the workplace revolution.

Originally published in 2001, Product Liability: Law & Insurance is a highly partical reference work that covers all facets of product liability. It looks at partical applications of the law and gives expert advice on how to operate in given situations; offering guidelines on how to avoid product liability problems and what to do in practice if things do go wrong.

A definitive new reference on the major failures of American corporate governance at the start of the 21st century. Tracing the market boom and bust that preceded Enron's collapse, as well as the aftermath of that failure, the book chronicles the meltdown in the telecom sector that gave rise to accounting scandals globally. Featuring expert analysis of the Sarbanes-Oxley legislation that was adopted in response to these scandals, the author also investigates the remarkable market recovery that followed the scandals. An exhaustive guide to the collapse of the Enron Corporation and other financial scandals that erupted in the wake of the market downturn of 2000, this book is an essential resource for students, teachers and professionals in corporate governance, finance, and law.

Public procurement and competition law are both important fields of EU law and policy, intimately intertwined in the creation of the internal market. Hitherto their close connection has been noted, but not closely examined. This work is the most comprehensive attempt to date to explain the many ways in which these fields, often considered independent of one another, interact and overlap in the creation of the internal market. This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement, which consolidate the principle of competition in terms very close to those advanced by the author in the first edition. This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules, and whether the latter (in their revised form) are adequate to ensure that competition is not distorted. The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective. Proceeding through a careful assessment of the general rules of competition and public procurement, the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement. It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law.

Arguing that the race to better humankind is about to go to a new dimension as a result of a nanotechnological revolution, this enthralling read purports that the depth of progress and technological development is such that people in the very near future may no longer be fully human. TransEvolution discusses the transition from human to someone-or something-new and different and the increasing trend of implementing prosthetics, organ implants, bionic eyes, hearing aids, and other technological augmentations. Humans are capable of doing things they never imagined would be possible 20 years ago, and the rapid growth of this trend is nowhere near its end. But do the benefits of these advancements come with a price? Is humanity in danger because of this domination of science and technology? Bestselling author Daniel Estulin describes his vision of the future in which he believes the elite will employ their Promethean plans.
