In addition, the information in Essentials is commonly accepted as the standard for fire fighting knowledge in North America. This 5th edition is a completely new revision and includes all the information needed to meet the fire fighting requirements for National Fire Protection Association (NFPA®) 1001, Standard for Fire Fighter Professional Qualifications (2008 edition), Fire Fighter Levels I and II. All photographs and illustrations are in full color. This manual includes instructional tools such as learning objectives, key terms, case histories, and review questions in each chapter to enhance a student's understanding. To help students with psychomotor learning, skill sheets depicting firefighter skills are included in most chapters. These feature step-by-step photographs and instructions for completing each skill. Each manual also includes a bonus CD-ROM that provides additional learning materials, case studies, animations, and learning activities.

This manual is designed to provide the firefighter candidate with the information needed to meet the fire-related performance objectives in NFPA 1001, Levels I and II. Contents: Firefighter orientation and safety Fire behavior Building construction Firefighter personal protective equipment Portable extinguishers Ropes and knots Rescue and extrication Forcible entry Ground ladders Ventilation Water supply Fire hose Fire streams Fire control Fire detection, alarm, and suppression systems Loss control Protective evidence for fire cause determination Fire department communications Fire prevention and public fire education.

This version includes all 21 chapters of Essentials of Fire Fighting, 6th Edition and adds three chapters written and validated to meet the emergency medical and hazardous materials requirements of NFPA® 1001, 2013 Edition. Chapter 22 specifically addresses the Firefighter I and Firefighter II knowledge and skills requirements for the emergency medical care competencies identified in NFPA® 1001, 2013 Edition Chapter 4. Chapters 23 and 24 meet the First Responder Awareness and Operations Levels for Responders according to NFPA® 472: Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents, 2012 Edition and OSHA 1910.120. The chapters also provide validated content to meet Section 6.6, Mission-Specific Competencies: Product Control, of NFPA® 472. The hazardous materials information is adapted from the IFSTA Hazardous Materials for First Responders, 4th Edition.

"The student workbook is intended as a study aid for students who will be participating in a class based on both the Essentials of Fire Fighting (5th edition) manual and the Essentials of Fire Fighting and Fire Department Operations (5th edition) manual. Instructors may choose to integrate these workbook activities into their classes or use them as homework assignments or pre-course work. Answers to the exercises are in the curriculum materials, not in the workbook. The information is divided into Firefighter I and Firefighter II sections. Different types of questions and activities are used to reinforce different learning styles and best present the information that is being addressed. References to page numbers are included in the workbook so students can use the product as a self-study tool by referring to the manual for correct answers. The use of the workbook will help improve student performances".
