Rails 5 has been out for several months now, and I've received many questions about when Everyday Rails Testing with RSpec will be updated to reflect the new version of the Rails framework and recent changes to RSpec. I've been quiet on the matter, but I finally have some news I'd like to share with everyone who's already supported my writing project, as well as those of you who have been on the fence about purchasing the book now.

By Aaron Sumner, November 20, 2017. File under: rspec . After the Rails core team announced major changes to controller-level testing upon the release of Rails 5.0, I wrote a couple of pieces in Everyday Rails about how to shift testing responsibility up, to either request specs, or browser-based feature specs (or system specs, in the current Rails testing landscape).

Using RSpec in Rails application requires rspec-rails gem to be added to your project. In doing so the dependent rspec gem is added to the project automatically. When the rspec-rails gem is added, the corresponding generator rspec:install appears in the list of available generators.
