Hexaflexagons Flexible Folds

In geometry, flexagons are flat models, usually constructed by folding strips of paper, that can be flexed or folded in certain ways to reveal faces besides the two that were originally

on the back and front.
And Other Flexible Folds

Flexagons are usually square
or rectangular

(tetraflexagons) or

hexagonal (hexaflexagons). A

prefix can be added to the

name to indicate the number

of faces that the model can

display, including the two
faces (back and front) that
are visible before flexing.
