(12th 12th Edition ...

Applied Finite Mathematics is designed for a finite mathematics course aimed at students majoring in business, management, economics, or the life or social sciences. The text can be understood by the average student with one year of high school algebra. A wide range of topics is included, giving the instructor

Applied Finite Mathematics

In mathematics, a norm is a function from a real or complex vector space to the nonnegative real numbers that behaves in certain ways like the distance from the origin: it commutes with scaling, obeys a form of the triangle inequality, and is zero only at the origin. In particular, the Euclidean distance of a vector from the
