## *User Guide - OpenSSL*

User Guide. for the OpenSSL FIPS Object Module. With the advent of the new 2.0 FIPS module there are now two distinct versions of the User Guide for the OpenSSL FIPS Object Module. The original User Guide document for the OpenSSL FIPS Object Module Version 1.2 (FIPS 140-2 validation certificate #1051) can be found at:

<http://openssl.org/docs/fips/UserGuide-1.2.pdf>  
The new User Guide document for the OpenSSL FIPS Object Module Version v2.0 (FIPS 140-2 validation certificate #1747) can be ...

## *User Guide - OpenSSL*

The unofficial FIPS user Guide also notes this restriction. That is worth repeating as the question appears repeatedly: you cannot modify the contents of the official tarball. The CMVP has imposed that very specific prohibition on all of the OpenSSL FIPS Object Module validations.

MySQL supports FIPS mode, if compiled using OpenSSL 1.0.2, and an OpenSSL library and FIPS Object Module are available at runtime. FIPS mode on the server side applies to cryptographic operations performed by the server. This includes replication (master/slave and Group Replication) and X Plugin, which run within the server.

Re: [openssl-users] Blank pages in FIPS 2.0 user guide Are the current iOS build instructions documented anywhere else? We haven't built for iOS in several years, at which time xCode was still using gcc.

*[openssl-users] Blank pages in FIPS 2.0 user guide*

FIPS mode imposes conditions on cryptographic operations such as restrictions on acceptable encryption algorithms or requirements for longer key lengths. For OpenSSL, the exact FIPS behavior depends on the OpenSSL version. For details, refer to the OpenSSL FIPS User Guide. System Requirements for FIPS Mode in MySQL

The Digi ConnectCore 6 module is FIPS 140-2 Level 1 certified. This topic describes how to enable, verify, and use FIPS-Capable OpenSSL on these modules. Check the current FIPS certificate at <https://csrc.nist.gov/projects/cryptographic-module-validation-program/Certificate/3176> . The FIPS (Federal Information Processing Standards) 140-2 level 1 standard is an information technology security approval program for cryptographic modules.
