How to streamline the recording of multitrack musical compositions is explained in order to create complex songs and realistic guitar loops with 32-bit internal mixing and advanced MIDI support. Musicians are then shown how the resulting song or loop can be exported to a WAV/MP3 file and how MIDI events can be exported to a standard MIDI file. Preparing FL Studio for effective work, carrying out the main operations, building patterns in Step Sequencer, creating a melody in the Piano Roll view, and assembling and mixing a composition using Playlist and Mixer are also described.

Managing in the Media has been devised for a broad audience. It is based upon the perceived need for a text that amalgamates cultural theories, film and television analysis, management theories and media production practice into one volume. There are many books on film and cultural studies. Similarly, there are copious numbers of texts written on management. To date little has been written that analyses the management of the audiovisual industry set against the backdrop of the cultural and economic environment within which the media manager operates. Managing in the Media is divided into three sections that take the reader from the global to the specific, from the strategic to the tactical. Each chapter discusses specific topics that can be read in isolation yet contribute to the theme within each part. Taken as a whole, the book provides the potential professional media manager and current practising media manager with a framework of issues that will give them an awareness of the range of knowledge needed by the successful media manager. This book does not try to be a manual to success. The media industry is awash with successful individuals none of whom needed textbooks to set them on their chosen career paths. Yet these exceptional people prove the rule; that in the main, most media practitioners would benefit from some additional support and guidance. The aim of this book is to present to them some of the management issues that have, or will have, an impact upon their working careers. The accompanying website www.mediaops.net (which can also be accessed via www.focalpress.com) features: - Tutor notes and reader activities - Updated list of further reading - Additional support material such as production templates - Interviews with the authors - A discussion forum - Industry and education links - Media News Devised by a practising media manager Contributing authors are experienced media practitioners and lecturers on undergraduate and post-graduate programmes Addresses all essential issues of managing media
