ISBN: 9780409057249 040905724X: OCLC Number: 868924518: Notes: 'Questions on International Financial Reporting Standards'---Cover. "It can be successfully used with the accounting textbook, 'Gripping GAAP' by C.L. Service'---Preface.

Financial accounting is the branch of accounting thought and practice concerned with preparing and providing information for external users of financial statements. This textbook helps students to understand the concepts that underpin the application of accounting theory to solve accounting problems. This international edition includes extracts from financial statements, definitions of key terms and exam examples. Unlike other textbooks, the author provides analysis of why accountants do what they do, and not just how. With such a wealth of accounting models and diagrams intertwined with this analysis, this book guides the reader through all the practicalities and concepts of financial accounting. Additional online questions, exercises and problems provide an opportunity to put this new-found knowledge into practice along the way. This book is an essential guide for students new to accountancy, and an equally useful tool for more experienced students and researchers.

The landmark study of cultural differences across 70 nations, Cultures and Organizations helps readers look at how they think--and how they fail to think--as members of groups. Based on decades of painstaking field research, this new edition features the latest scientific results published in Geert Hofstede's scholarly work Culture's Consequences, Second Edition. Original in thought and profoundly important, Cultures and Organizations offers vital knowledge and insight on issues that will shape the future of cultures and nations in a globalized world.

This book helps readers evaluate and specify the best Warehouse Management System (WMS) for their need. The advice is based on practical knowledge, describing in detail fundamental processes and technologies needed for a basic understanding. New approaches in the structure and design of WMS are presented, along with discussion of the limitations of current systems. The book shows how to operate a simple WMS based on the open-source initiative myWMS.

Auditing Fundamentals in a South African Context: Graded Questions offers applied question material which supports students learning throughout the undergraduate level of the B.Com, B.Compt, and B.Acc (Accounting) Auditing curriculum. The second edition offers substantially expanded content, providing many additional questions in every area of the curriculum. A real-world focus engages students to apply their knowledge to a range of interesting and realistic scenarios. The content tests all concepts, from introductory through to advanced level, providing step-by-step guidance to support the development of sound exam question technique. The question levels within each area of the curriculum are varied and structured to ensure that students acquire a broad understanding, effective integration of knowledge, and a thorough mastery of exam technique. Auditing Fundamentals in a South African Context: Graded Questions includes the following features: A unique selection of example questions, with step-by-step exam technique guidance, coaches students to develop independent skills in exam technique, supporting understanding of how solutions should be worked. Multiple authorship of the question book delivers a balanced variation in the question presentation style, effectively offering a selection of styles representative of various respected academic institutions. Selected solutions are provided within the text. Solutions to all questions in the second edition are available to prescribing lecturers on the Oxford University Press Learning Zone website. In addition to the material in this book, the Oxford University Press Learning Zone website offers further assessment resources: For lecturers, a substantial body of new and unseen worked question material, with solutions. For students, automatically-marked, short, formative assessment questions which may be used for independent self-assessment, and which cover the entire scope of the Auditing curriculum. Auditing Fundamentals in a South African Context: Graded Questions is designed to complement the structure and approach of the textbook Auditing Fundamentals in a South African Context, making these ideal companion volumes, whilst also functioning effectively as a stand-alone question book.

"The book teems with eccentric characters and scenes that made my skin crawl.... Explained simply, read easily, Bad Paper defies expectations. It should also raise quite a few alarms."--Colin Dwyer, NPR The Federal Trade Commission receives more complaints about rogue debt collecting than it does about any activity besides identity theft. In Bad Paper, journalist Jake Halpern reveals why. He tells the story of Aaron Siegel, a former banking executive, and Brandon Wilson, a former armed robber, who become partners and go in quest of "paper"--the uncollected debts that are sold off by banks for pennies on the dollar. As Aaron and Brandon learn, the world of consumer debt collection is an unregulated shadowlnd, where operators often make unwarranted threats and even collect debts that are not theirs. Introducing an unforgettable cast of characters, Halpern chronicles Aaron and Brandon's lives as they manage high-pressure call centers, hunt for paper in Las Vegas casinos, and meet in parked cars to sell the social security numbers and account information of unsuspecting consumers. The result is a vital expos  on the cost of a system that compounds the troubles of hardworking Americans and an astonishing feat of storytelling.

Algae is a miracle of Nature. Rich, in Amino acids, Proteins, Lipids, Carbohydrates, Anti-oxidants, phycobilliproteins, and other valuable products, algae is being tapped as the new feedstock across industries. This Book describes how to build your own Photobioreactor to grow pure algae species (taxa). Algae, are Earths "engine" to fuel the food web. As a "primary producer," responsible for nearly half the oxygen production on Earth, the power of algae is being commercialized to produce valuable organic products. Build your own, Algae Photobioreactor (PBR) grow kit, to Cultivate valuable algal strains, and tap into the rapidly growing Algae Industry. Grow algae reliability, and repeatably, with Photobioreactor (PBR) Algae Grow Kits for controlled photosynthesis. Grow up to Four different Algal taxa using these 4-vessel Algae grow kits rated at 80 Liter total capacity. Complete with optical, mechanical, electrical, pneumatic, and biological systems, photobioreactors give you complete control. Growing monocultures of algae, using photobioreactors, is useful for researchers, developers, companies, universities, and those who need to cultivate Algal monocultures with purity, and minimal cost of construction. Algae, produce valuable amino-acids, proteins, carbohydrates, and essential oils (lipids) consuming water-borne pollution for nutrients. Algae species, grown with your PBR algae grow kits, enable researchers to tap algae's enormous productivity, able to double in mass in 24 hours under exponential growth phase. Algal researchers, work to develop protocols for increased production. Growing algae converts water, in-organic compounds (CO2), and solar radiation into valuable organic molecules. This eBook is written as a resource for building your own photobioreactor, and growing valuable algal strains. This Book is written, as a resource for researchers, to construct an effective bioreactor, rated at 80 Liters, for growing algae monocultures. Isolated from contamination, these photobioreactors, offer the researcher total control of all inputs, and thermodynamic conditions, to grow a specific monoculture algal strain. Grow Algae for Profit, using photobioreactors, to produce useful quantities of pure species (taxa). Grow Algal Biomass, for your experiments, or for sale, with this easy-to-build Photobioreactor.
