It's not possible for people to walk, or even drive, to many places. Buses, trains, and airplanes get us where we need to go. Unfortunately, wherever large groups of people gather, there are sure to be a lot of germs--and other unpleasant things, too. The more we learn about these things, the more we can keep healthy and adopt behaviors to keep others healthy as well. The gross things hidden from view, or impossible to see with the human eye, on several modes of transportation are discovered through accessible text and engaging, fun facts.

It's not possible for people to walk, or even drive, to many places. Buses, trains, and airplanes get us where we need to go. Unfortunately, wherever large groups of people gather, there are sure to be a lot of germs{u2014}and other unpleasant things, too. The more we learn about these things, the more we can keep healthy and adopt behaviors to keep others healthy as well. The gross things hidden from view, or impossible to see with the human eye, on several modes of transportation are discovered through accessible text and engaging, fun facts.

Martin Bodek spent a year encountering the nose-pickers, nail-clippers, cellphone-yappers, lane cut-offers, people who stand akimbo, child slappers, personal space invaders, stores that have cashiers who can't decipher coupons, customer service idiots, the rude, the people who need BlackBerry helmets, line cutters, public masturbators, escalator mudsticks, teenagers discussing what liquids induce abortion, and decided to write about it. This is what he wrote.

Offers themes for each month which use finger-play, songs, and activities to help motor development in three- to six-year-olds

Charlie the Pearl-con man, gambler, and ever absent father-is about to catch the dream that he's chased his entire life-the secret of good luck. But it's a secret that could cost Charlie the only thing in the world that he loves more than a winning streak-his daughter.

After exploring most of the Southeast in Hang the Elephant, John returns to cover the last corner - Florida. Along the way, John highlights all the horrific and weird stories Florida has to tell, and realizes his place in the world along the way. This book is full of amazing and strange tales from the Sunshine State, from the Panhandle to the Keys. Read all about cursed dolls, dolphin lovers, and serial killers. Lots and lots of serial killers.

"In his insightful study, Gregory L. Thompson examines the demise of passenger trains and the rise of buses in California and demonstrates that railroad management's shortsighted response to the growing use of automobiles contributed to its own decline." "After peaking about 1910, the use of intercity passenger trains rapidly gave way to the onslaught of the automobile. For the next three decades, railroad managers tried, but failed, to adapt the passenger train to the new competition. Although previous studies have suggested that regulation and a conspiracy between rail and bus management played a significant role in the decline of the industry, Thompson reaches a different conclusion. Focusing on the California operations of two major railroads and the largest intercity bus company in the United States, he demonstrates that railroad management failed to accurately assess the demand for its service and the costs of providing it. According to Thompson, railroad management's faulty planning and its misleading accounting system eventually did the passenger train in, while superior corporate planning within bus companies led to their success." "Based on previously unseen data, *The Passenger Train in the Motor Age* offers an illuminating portrait of a critical time in railroad history."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Praised by Jack Gantos, author of *Dead End in Norvelt*, as "a quick read with a kick at the finish," this debut novel sensitively and memorably captures a teen runner's relationship with his autistic older brother. Like most siblings, Leo and Caleb have a complicated relationship. But Caleb's violent outbursts literally send Leo running. When the family is forced to relocate due to Caleb's uncontrollable behavior, Leo tries to settle into a new school, joining the cross-country team and discovering his talent for racing and endurance for distance. Things even begin to look up for Leo when he befriends Curtis, a potential state champion who teaches Leo strategy and introduces him to would-be girlfriend, Mary. But Leo's stability is short-lived as Caleb escalates his attacks on his brother, resentful of his sport successes and new friendships. Leo can't keep running away from his problems. But, with a little help from Curtis and Mary, he can appreciate his worth as a brother and his own capacity for growth, both on and off the field. Praise from Jack Gantos, author of *Dead End in Norvelt*, *Hole in My Life* and *The Trouble With Me*: "Currinder's novel, *Running Full Tilt*, is a fast-paced convincing drama of a young runner whose legs circle him back to the many conflicts he is trying to escape--but he can't outrun himself. A quick read with a kick at the finish." Praise from Paul Volponi, author of *The Final Four*, *Black and White*, and *Rikers High*: "We feel the inner strength it takes to compete on every page of this splendid narrative, until, as readers, we are running as well--engrossed, and loving every step of the journey."

David McClurry presents his latest invention, a type of radio-frequency identification (RFID) device, before the department of commerce in June of 2035. Though very interested by the potential applications of this new hardware in an effort to improve the American economy, the department decides to pass on Davids project. Their decision prompts him to try his luck in politics and launch the Americou Political Party three years later. Notwithstanding the lack of campaign and advertisement funds, McClurry runs for president in the fall of 2038. His political party is in limbo after an unexpected arrest and is beaten by John Morey of the Democratic Party. David is sentenced to ten years in federal prison for having avenged the murder of a friend. As Morey comes across Davids project the following summer, he sets him free from prison temporarily and asks him to run The Chip, hopefully improving the economy. Aware of Moreys scheme and unable to fully carry out the Democrats plan, David McClurry becomes the new dictator of the United States and the new leader of an unprecedented postcapitalist world.
