Guided imagery (also known as guided affective imagery, or katharm-imaginative psychotherapy (KIP)) is a mind-body intervention by which a trained practitioner or teacher helps a participant or patient to evoke and generate mental images that simulate or re-create the sensory perception of sights, sounds, tastes, smells, movements, and images associated with touch, such as texture, temperature, and pressure, as well as imaginative or mental content that the participant or patient ...

**Guided Imagery - Wikipedia**

Definition Guided imagery involves using a series of multi-sensory images designed to trigger specific changes in physiology, emotions, or mental state for the purpose of increasing healing response or unconscious changes. Guided Imagery often begins with a series of relaxation techniques, although this is not always so.

**Guided Imagery - Whole Health - Veterans Affairs**

Guided Imagery uses your imagination to help your mind and body deal with difficulties or trauma, gain understanding about perplexing issues, develop new habits, and achieve your goals. It is done while in a state of relaxed but very focused concentration, much like what is seen in meditation practices.

**What is Guided Imagery? - The Heart's Way**

Guided imagery (sometimes called guided meditation, visualization, mental rehearsal, and guided self-hypnosis) is a gentle but powerful technique that focuses the imagination in proactive, positive ways. It can be as simple as an athlete's 5-second pause, just before leaping off the diving board, imagining how a perfect dive feels when slicing through the water.

**What is Guided Imagery? | Health Journeys**

Guided imagery refers to a variety of gentle but powerful techniques, including visualization and sensory experiencing, to help you, the listener, feel greater calm ease, as well as relief from physical distress.
