This coffee table book is the entire collection of every diagram in The Bible Project Read Scripture series alongside short, written summaries of each book. The diagrams include the Old Testament and New Testament books in the Protestant tradition. These illustrated summaries are bound together in a gray cloth hardcover binding. The dimensions of this book are 19in x 12in (48cm x 30cm). It is perfect for displaying on a table or to use during family Bible studies or small groups.

Indexes science fair projects and experiments in books published from 1985 to 1989.

For courses currently engaged, or leaning toward calculus reform. Callahan fully embraces the calculus reform movement in technology and pedagogy, while taking it a step further with a unique organization and applications to real-world problems.

The Design of Coffee provides a non-mathematical introduction to chemical engineering, as illustrated by the roasting and brewing of coffee. Hands-on coffee experiments demonstrate key engineering principles, including material balances, chemical kinetics, mass transfer, fluid mechanics, conservation of energy, and colloidal phenomena. The experiments lead to an engineering design competition where contestants strive to make the best tasting coffee using the least amount of energy - a classic engineering optimization problem, but one that is both fun and tasty! Anybody with access to a sink, electricity, and inexpensive coffee roasting and brewing equipment can do these experiments, either as part of a class or with your friends at home. The Design of Coffee will help you understand how to think like an engineer - and how to make excellent coffee! This revised second edition presents streamlined lab experiences, adds new bonus material on industrial coffee operations, and includes a new lab experience focused on sensory analysis during traditional cupping of coffee. FEATURES: * Covers all aspects of making coffee, from green beans to the final brew * Does not require calculus or college-level chemistry * Emphasizes the scientific method and introductory data analysis with guided data sheets and lab report questions * Includes 10 full experiments, each with background on key concepts, overview of necessary equipment, and detailed instructions: Lab 0 - Safety Overview and Introduction to Tasting Coffee Lab 1 - Reverse Engineering a Drip Coffee Brewer Lab 2 - Process Flow Diagram and Mass Balances for Coffee Lab 3 - The pH of Coffee and Chemical Reactions Lab 4 - Measuring the Energy Used to Make Coffee Lab 5 - Mass Transfer and Flux during Brewing Lab 6 - Coffee as a Colloidal Fluid and the Effect of Filtration Lab 7 - First Design Trials: Optimizing Strength & Extraction Lab 8 - Second Design Trials: Scaling Up to 1 Liter of Coffee Lab 9 - Design Competition and Blind Taste Panel

For travellers to the Caribbean by cruise or small ship, this beautifully illustrated guidebook covers ports of call, large and small, on islands throughout the Caribbean. You'll find vital information to help you make the most of stops at each port city, including how to get to the sights from the port, what to see in a short amount of time ashore, and how to avoid pricey excursions. This guidebook begins with an absorbing history and culture chapter detailing the region's fascinating history as a crucible of colonial trade, piracy, and slavery, and its subsequent development into one of the most popular tourist destinations on Earth. At the end of every port description, you'll receive invaluable need-to-know information on each place on your itinerary. A handy Travelwise section includes restaurants as well as don't-miss festivals, the best shopping venues, and information on both cultural events and outdoor activities that will help you plan ahead for your Caribbean trip of a lifetime. You don't have to be on a cruise ship to use this fact-filled guide. Independent sailors and land lovers alike will also benefit from its invaluable information.

The Snail Soup Can Decoy to keep the candy stash safe. The Customizable "Keep Out" Sign to deter meddlesome siblings and parents. A Bunk Bed Communicator made from cardboard tubes ("Psst! Can you keep the snoring down?"). Clever, whimsical, and kind of genius, here are 67 unique projects that will turn any dad with DIY leanings into a mad scientist hero that his kid(s) will adore. No screens, no hi-tech gadgetry. Made by Dad combines the rough-edged, handmade ethos of a Boy Scout manual or The Dangerous Book for Boys with a sly sense of humor that kids love. Scott Bedford, a creative director by day and Webby Award-winning blogger by nights and weekends, wields an X-ACTO knife, magic marker, and prodigious imagination to create endlessly delightful projects for his two sons. He knows that kids like contraptions and gadgets, things that are surprising—a chair that appears to be balanced on eggshells. Things that are complex—a multilevel city, with buildings, tunnels, and roads, built from old boxes around the legs of a table. And especially things with humor—the Snappy Toast Rack, made to resemble a crocodile's gaping mouth. The projects are shown in full-color photographs, and the instructions are illustrated in detailed line drawings that exude personality. Some are quick and simple enough to be done in a coffee shop; others are more of an afternoon project—yielding hours and hours of rich, imaginative playtime.

Describes the sights and attractions of the Caribbean; offers background information on the region's history and culture; suggests walking and driving tours; and includes tips on finding hotels, restaurants, and shopping centers.

If you are among the millions of Americans with crooked, stained, or missing teeth, this is the book you've been looking for. If you are painfully aware that your smile holds you back socially and professionally, your roadmap to a winning smile can be found between these covers. In this book, ten of the top cosmetic dentists in the country answer all your questions and help you understand the countless ways in which you, (and even your family), will benefit dramatically from upgrading the first impression you make. Before you make the important investment in a smile makeover, you'll have dozens of questions. What are the procedures? What do they cost? How do I select a top-notch cosmetic dentist who will give me the dazzling smile I want to wear for the rest of my life? In A Cup of Coffee with 10 of the Top Cosmetic Dentists in the United States, you will learn the answers to these questions and more. You will learn about how your life can be transformed by investing in the person who stares out at you from the mirror each morning. Do you deserve a new smile? Inquire within.
