Henrietta's oldest daughter who died in the Crownsville State Hospital Who was Sir Lord Keenan Kester Cofield? A con artist that, upon being discovered, attempted to sue John Hopkins and the Lacks family What did Mary write on the side of the of each test tube containing Henrietta's cells after the first culture was taken?

#1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE “MOST INFLUENTIAL” (CNN), “DEFINING” (LITHUB), AND “BEST” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE’S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As

Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

**How to Use This Book** This book is to be used alongside the bestselling book, *The Immortal Life of Henrietta Lacks* by Rebecca Skloot for anyone interested in learning about one of the most important tools in medicine, vital for developing the polio vaccine, cloning, gene mapping, and more, the HeLa cells. This is also the story of the collision between ethics, race, and medicine; of scientific discovery and faith healing; and a daughter consumed with questions about the mother she never knew. For students: The study questions are in order and follow Rebecca Skloot’s narrative. Answer questions as you read the book. Answers follow each question. For teachers: This is an easy and interesting resource to help your students learn about a specific tool used in medicine, the HeLa cell and how it originated and the impact its discovery had on medicine and the population. Use your own unique teaching style to supplement the *Pembroke Notes* with engaging activities and links for further investigating. With the new Common Core standards and a push to increased rigor, I have added a *Writing Workshop* section at the end of my book to help you with writing assignments. For homeschools: Your high school student will love the easy guide to help him/her in her reading *The Immortal Life of Henrietta Lacks*. Parents, be prepared for active discussions with your teenager while you read along. A *Writing Workshop* is supplied at the end of the book as a guide."

*A Conspiracy of Cells* presents the first full account of one of medical science's more bizarre and costly mistakes. On October 4, 1951, a young black woman named Henrietta Lacks died of cervical cancer. That is, most of Henrietta Lacks died. In a laboratory dish at the Johns Hopkins Medical Center in Baltimore, a few cells taken from her fatal tumor continued to live--to thrive, in fact. For reasons unknown, her cells, code-named "HeLa," grew more vigorously than any other cells in culture at the time. Long-time science reporter Michael Gold describes in graphic detail how the errant HeLa cells spread, contaminating and overwhelming other cell cultures, sabotaging research projects, and eluding detection until they had managed to infiltrate scientific laboratories worldwide. He tracks the efforts of geneticist Walter Nelson-Rees to alert a sceptical scientific community to the rampant HeLa contamination. And he reconstructs Nelson-Rees's crusade to expose the embarrassing mistakes and bogus conclusions of researchers who unknowingly abetted HeLa's spread.

Documents the story of how scientists took cells from an unsuspecting descendant of freed slaves and created a human cell line that has been kept alive indefinitely, enabling discoveries in such areas as cancer research, in vitro fertilization and gene mapping. Includes reading-group guide. Reprint. A best-selling book.

The authors of *Make Just One Change* argue that formulating one’s own questions is “the single most essential skill for learning”—and one that should be taught to all students. They also argue that it should be taught in the simplest way possible. Drawing on twenty years of experience, the authors present the *Question Formulation Technique*, a concise and powerful protocol that enables learners to produce their own questions, improve their questions, and strategize how to use them. *Make Just One Change* features the voices and experiences of teachers in classrooms across the country to illustrate the use of the *Question Formulation Technique* across grade levels and subject areas and with different kinds of learners.

Jane Pauley, “America’s baby boomer” (Tom Brokaw) and the new anchor of CBS Sunday Morning, offers an inspirational guidebook “chockablock with keen insights for career transitions” (*USA TODAY*). In 2014, every baby boomer will have reached the milestone age of fifty. For most, it’s not an end, but the beginning of something new. Research has shown that people in their fifties are more vital now than they were only ten years ago. They’re saying, “I’m game, I’m up for it, I want to do more.” Jane Pauley, one of America’s most beloved and trusted broadcast journalists, offers humor and insight about the journey forward. The *New York Times* bestseller *Your Life Calling* is a fresh look at ideas that have been simmering since boomers first entered midlife with a different perspective on the future than any generation before: that there was more to come—and perhaps the best of all. Jane is not an advice giver but a storyteller. Here she tells her own and introduces readers to the fascinating people she has featured on her award-winning *Today* show segment, “*Life Reimagined Today*.” You’ll meet Betsy McCarthy, who traded in her executive briefcase for knitting needles; Gid Pool, who launched a career as a stand-up comic; Richard Rittmaster, who joined the National Guard Chaplain Corps; Trudy Lundgren, who took her home on the road in an RV; Paulie Gee, who opened a successful pizzeria in Brooklyn; and many more. “Jane Pauley is a wonderful guide to all the different ways you can open new doors in life, many of which lead to unexpected places. She shows with humor and insight why the journey to reinvention can come from all kinds of places and produce all kinds of joys” (Michael J. Fox). *Your Life Calling* is delightful, compelling, and motivating for anyone asking “What am I going to do with my supersized life?”

David Morrow and Anthony Weston build on Weston's acclaimed *A Rulebook for Arguments* to offer a complete textbook for a course in critical thinking or informal logic. Features of the book include: Homework exercises adapted from a wide range of actual arguments from newspapers, philosophical texts, literature, movies, YouTube videos, and other sources. Practical advice to help students succeed when applying the *Rulebook's* rules. Suggestions for further practice that outline activities students can do by themselves or with classmates to improve their critical thinking skills. Detailed instructions for in-class activities and take-home assignments designed to engage students in critical thinking. An appendix on mapping arguments, a topic not included in the *Rulebook*, that introduces students to this vital skill in evaluating or constructing complex and multi-step arguments. Model responses to odd-numbered exercises, including commentaries on the strengths and weaknesses of selected model responses as well as further discussion of some of the substantive intellectual, philosophical, and ethical issues raised by the exercises. The third edition of *Workbook* contains the entire text of the recent fifth edition of the *Rulebook*, supplementing this core text with extensive further explanations and exercises. Updated and improved homework exercises ensure that the examples continue to resonate with today’s students. Roughly one-third of the exercises have been replaced with updated or improved examples. A new chapter on engaging constructively in public debates—including five new sets of exercises—trains students to engage respectfully and constructively on controversial topics, an increasingly important skill in our hyper-partisan age. Three new critical thinking activities offer further opportunities to practice constructive dialogue.

A study in the collision between Western medicine and the beliefs of a traditional culture focuses on a hospitalized child of Laotian immigrants whose belief that illness is a spiritual matter comes into conflict with doctors' methods.
