The windshield washer system is pretty simple. The washer pump is located in the washer bottle. When the washer button is pushed, the pump draws fluid from the bottle and sends it through a tube to the nozzle. This is how washer...

XT350 and TT350 1985-2000

What guidance does academic research really provide to economic policy development? The critical and analytical surveys in this volume investigate links between policies and outcomes by surveying work from broad macroeconomic policies to interventions in microfinance. Asserting that there are no universal correspondences between policies and outcomes, contributors demonstrate instead that only an intense familiarity with the development context and the universe of applicable economic models can generate successful policies. Getting cause-and-effect right is essential for policy design and implementation. With the goal of drawing researchers and policy makers closer, this volume highlights our increasing understanding of ways to combine economic theorizing with careful, thoughtful empirical work. * Presents an accurate, self-contained survey of the current state of the field * Summarizes the most recent discussions, and elucidates new developments * Although original material is also included, the main aim is the provision of comprehensive and accessible surveys

This volume presents the results of the 6th Input-Output Meeting, organized in Warsaw, Poland, December 16-18, 1985 by IIASA and the Institute of Econometrics and Statistics, University of Lodz. The main aim of the meeting was to demonstrate the use of integrated input-output models in economic policy making, both at the national and the industrial level.

This self-contained volume covers fundamental and applied aspects of nitrogen-fixation research. The book describes milestones in the discovery of the associative and endophytic nitrogen-fixing bacteria found involved with cereal crops, forage grasses, and sugar cane. It provides a comprehensive overview of their phylogeny, physiology, and genetics as well as of the biology of their association with their host plants, including tools for in situ localization and population-dynamics analysis. Also included are chapters describing the functions required for a bacterium to be competent and competitive in the rhizosphere, and analysis of associations of cyanobacteria with fungi, diatoms, bryophytes, cycads, Azolla, and Gunnera.

Exchange 2000. NET Server Black Book is a comprehensive reference to administering, configuring, and troubleshooting Exchange 2000. Written in the popular Black Book problem-solving format, the book teaches you how to utilize the new features of Exchange 2000 and SMTP. It covers migrations issues and planning for: design and integration, site topology and organization, corporate and user's needs, Exchange Service selection, and disaster recovery. It has detailed coverage of how Exchange 2000 works and explains the relationship between Windows 2000 and Exchange 2000.

Challenges beliefs about technology's assumed potential for enabling a continuation of current consumption rates, arguing for extensive reform while explaining that technological advances are hastening an environmental collapse. Original.

Describes a ranking system used to evaluate the potential invasiveness and impacts of 113 non-native plants to natural areas in Alaska. Species are ranked by a series of questions in four broad categories: ecosystem impacts, biological attributes, distribution, and control measures. Also included is a climate screening procedure to evaluate the potential for establishment in three ecogeographic regions of Alaska [Juneau, Fairbanks, Nome].

Given the history of concepts like meaning, time, language, and discourse, any serious attempt to understand them must be interdisciplinary; so MEANING, LANGUAGE, AND TIME draws on a wide range of important work in the history of philosophy, rhetoric, and composition. In this groundbreaking work, Porter joins these conversations with the aim of breaching the traditional disciplinary walls and opening new areas of inquiry.

This book explores the economic, social and political forces that shaped the grain market in the Roman Empire. Examining studies on food supply and the grain market in pre-industrial Europe, it addresses questions of productivity, division of labour, market relations and market integration. The social and political aspects of the Roman grain market are also considered. Dr Erdkamp illustrates how entitlement to food in Roman society was dependent on relations with the emperor, his representatives and the landowning aristocracy, and local rulers controlling the towns and hinterlands. He assesses the response of the Roman authorities to weaknesses in the grain market and looks at the implications of the failure of local harvests. By examining the subject from a contemporary perspective, this book will appeal not only to historians of ancient economies, but to all concerned with the economy of grain markets, a subject which still resonates today.
