Relationships are the very foundation of our lives. Whether personal or professional, our ability to understand and communicate effectively with the people in our lives can make the difference between a satisfying, fulfilling life and one filled with tension and frustration. With this in mind, it's surprising that so few of us take the time to critically examine the makeup and workings of these connections. This text examines human relations by integrating key components of successful relationships: internal influences on thoughts, feelings, and behaviors ; external or sociocultural influences and communication principles and skill building. These main features help drive students towards better understanding and more effective communication within all of their relationships.

The number of ways in which humans interact with animals is almost incalculable. From beloved household pets to the steak on our dinner tables, the fur in our closets to the Babar books on our shelves, taxidermy exhibits to local zoos, humans have complex, deep, and dependent relationships with the animals in our ecosystems. In *Displaying Death and Animating Life*, Jane C. Desmond puts those human-animal relationships under a multidisciplinary lens, focusing on the less obvious, and revealing the individualities and subjectivities of the real animals in our everyday lives. Desmond, a pioneer in the field of animal studies, builds the book on a number of case studies. She conducts research on-site at major museums, taxidermy conventions, pet cemeteries, and even at a professional conference for writers of obituaries. She goes behind the scenes at zoos, wildlife clinics, and meetings of pet cemetery professionals. We journey with her as she meets Kanzi, the bonobo artist, and a host of other animal-artists—all of whom are preparing their artwork for auction. Throughout, Desmond moves from a consideration of the visual display of unindividuated animals, to mourning for known animals, and finally to the marketing of artwork by individual animals. The first book in the new *Animal Lives* series, *Displaying Death and Animating Life* is a landmark study, bridging disciplines and reaching across divisions from the humanities and social sciences to chart new territories of investigation.

The indispensable guide to developing a personal brand, building an audience, and nurturing followers, by digital marketing thought-leader Cynthia Johnson. In the modern world, influence is everything and personal branding equals influence. *Platform* is the why-to, how-to handbook by top expert Cynthia Johnson for everyone who wants to develop and manage a personal brand. In *Platform*, Johnson explains the process of going from unknown to influencer by achieving personal proof, social proof, recognition, and association. Johnson herself went from an on-staff social media manager to social media influencer, entrepreneur, and marketing thought-leader in just three years using her process of accelerated brand development, continuous brand management, and strategic growth. Fans of #GirlBoss and #AskGaryVee, who wonder how their favorite influencers found their voices and built their audiences, will find the answers here and discover that the process is technical, creative, tactical, and much easier than they might have expected.

"Illustrated and with essays by Martin Kemp, *Spectacular Bodies* reveals a new way of seeing ourselves."--BOOK JACKET.

A chess match seems as solitary an endeavor as there is in sports: two minds, on their own, in fierce opposition. In contrast, Gary Alan Fine argues that chess is a social duet: two players in silent dialogue who always take each other into account in their play. Surrounding that one-on-one contest is a community life that can be nearly as dramatic and intense as the across-the-board confrontation. Fine has spent years immersed in the communities of amateur and professional chess players, and with *Players and Pawns* he takes readers deep inside them, revealing a complex, brilliant, feisty world of commitment and conflict. Within their community, chess players find both support and challenges, all amid a shared interest in and love of the long-standing traditions of the game, traditions that help chess players build a communal identity. Full of idiosyncratic characters and dramatic gameplay, *Players and Pawns* is a celebration of the fascinating world of serious chess.

A smart and concise guide to staying together that draws on scientific findings, expert advice, and years in the marital trenches to explain why marriage is better for your health, your finances, your kids, and your happiness Like you, probably, Belinda Luscombe would rather have had her eyes put out than read a book about marriage; they all seemed full of advice that was obvious, useless, or bad. Plus they were boring. But after covering the relationship beat for *Time* magazine for ten years, she realized there was a surprisingly upbeat and little-known story to tell about the benefits of staying together for the long haul. Casting a witty, candid, and probing eye on the latest behavioral science, Luscombe has written a fresh and persuasive report on the state of our unions, how they've changed from the marriages of our parents' era, and what those changes mean for the happiness of this most intimate and important of our relationships. In *Marriageology* Luscombe examines the six major fault lines that can fracture contemporary marriages, also known as the F-words: familiarity, fighting, finances, family, fooling around, and finding help. She presents facts, debunks myths, and provides a fascinating mix of research, anecdotes, and wisdom from a wide range of approaches—from how properly dividing up chores can result in a better sex life to the benefits of fighting with your spouse (though not in the

car) to whether or not to tell your partner that you lost \$70,000. (The last one is from firsthand experience.) Marriageology offers simple, actionable, maybe even borderline fun techniques and tips to try, whether the relationship in question is about to conk out or just needs a little grease and an oil change. The best news of all is that sticking together is easier than it looks. Praise for Marriageology “Drawn from what she learned covering the relationship beat for Time, Luscombe’s how-not-to-split-up manual is witty and wise.”—People “People are still getting married, and this book is here to help. . . . A warm and companionable volume . . . [Luscombe has a] wry touch, a gift for scene-setting, and an endearingly even temper.”—The New Yorker “Few things are more important than the quality of our relationships—and especially the one we build with our life partners. Belinda Luscombe has written a smart and funny book to help anyone work toward a stronger and more fulfilling marriage.”—Sheryl Sandberg, COO of Facebook and founder of LeanIn and OptionB

A lyrical and meditative tour de force that traces the evolution of man and science, including the rise of scientific inquiry In The Firmament of Time—nominated for a National Book Award—Loren Eiseley offers a series of brilliant, provocative excursions through the history of science. A paleontologist with the soul and skill of a poet, he reflects on the many ways in which the quest for knowledge has been shaped by the changing cultures in which it emerged and developed. Examining the role of metaphor in scientific thought, anticipations of scientific discoveries in the works of poets and novelists, and the “unconscious conformity” of scientific theory to prevailing orthodoxies, he argues for the ongoing relevance of dreams, the imagination, and the irrational to scientific progress.

The Art of Human Resources serves as a workbook and constant reference tool that should be kept on your active bookshelf. You can follow the steps outlined in the Inside Out Model, or choose relevant areas that you need to develop and explore.

For readers of Malcolm Gladwell, Daniel Pink, and Freakonomics, comes a captivating and surprising journey through the science of workplace excellence. Why do successful companies reward failure? What can casinos teach us about building a happy workplace? How do you design an office that enhances both attention to detail and creativity? In The Best Place to Work, award-winning psychologist Ron Friedman, Ph.D. uses the latest research from the fields of motivation, creativity, behavioral economics, neuroscience, and management to reveal what really makes us successful at work. Combining powerful stories with cutting edge findings, Friedman shows leaders at every level how they can use scientifically-proven techniques to promote smarter thinking, greater innovation, and stronger performance. Among the many surprising insights, Friedman explains how learning to think like a hostage negotiator can help you diffuse a workplace argument, why placing a fish bowl near your desk can elevate your thinking, and how incorporating strategic distractions into your schedule can help you reach smarter decisions. Along the way, the book introduces the inventor who created the cubicle, the president who brought down the world’s most dangerous criminal, and the teenager who single-handedly transformed professional tennis—vivid stories that offer unexpected revelations on achieving workplace excellence. Brimming with counterintuitive insights and actionable recommendations, The Best Place to Work offers employees and executives alike game-changing advice for working smarter and turning any organization—regardless of its size, budgets, or ambitions—into an extraordinary workplace.
