I Am a Strange Loop is a 2007 book by Douglas Hofstadter, examining in depth the concept of a strange loop to explain the sense of "I". The concept of a strange loop was originally developed in his 1979 book *Gödel, Escher, Bach*. In the end, we are self-perceiving, self-inventing, locked-in mirages that are little miracles of self-reference.

You will not go away understanding what Hofstadter means by "A Strange Loop". Expecting science or philosophy, you will find autobiography. For those who are curious to find the very best of Hofstadter's ideas, stripped of the autobiography, I highly recommend "Surfaces and Essences". For the "fans", this is not a book you want to miss.

When I saw a copy of "I Am a Strange Loop" in a used-book store, and Hofstadter said in the intro it was his update of "Godel, Escher, Bach," I figured this was my chance to rediscover the concepts in "Godel, Escher, Bach." Well, I did, but I can't say I was happy with the result.

A strange loop is a cyclic structure that goes through several levels in a hierarchical system. It arises when, by moving only upwards or downwards through the system, one finds oneself back where one started. Strange loops may involve self-reference and paradox.

There is much here and I do not doubt that writing "I am a Strange Loop" was a labor of love in more ways than one. It is, as with other somatic theories, even possible that oscillating fields in the brain have a lot to do with consciousness and personal identity.
