Florian Spitzhüttl, Institute for Traffic Accident Research. Over the past 15 years, the number of fatalities in road traffic in Germany decreased continuously from around 6800 to just under 3200. In the same period, the number of traffic accidents recorded by the police remained roughly constant. In addition to infrastructural changes, this is primarily a result of improved passive and active vehicle safety, to which traffic accident investigation and analyses have made a crucial contribution.

~~Applications in Traffic Accident Research to Improve ...~~

Even though technology, safety measures and accident prevention are developing constantly, accidents and close to collision events are increasing. This is due to the significant increase in national and global air traffic. The master's programme Traffic Accident Research - Aviation Safety at TU Graz is unique in Austria. In this programme, internationally renowned experts share their knowledge of aviation technology, electronics, environmental conditions and human factors in aviation.

~~University Programme in Traffic Accident Research ...~~

Research has found that traffic accidents are significantly more dreaded in Japan than in the US (Kleinhesselink and Rosa, 1991, Kleinhesselink and Rosa, 1994, Hinman et al., 1993). As seen in our analysis, the majority of traffic-accident deaths in Japan are not among car users.
