after assignment. Late homework will not be accepted. A subset of the assigned problems will be selected for grading. Solutions must meet the formatting requirements below.

~~Math 4317 Course Webpage~~

Let $a, b, c, d \in \mathbb{R}$ and consider each of the following statements. Decide which are true and which are false. Prove the true ones and give counterexamples to the false ones.

a) If $a < b$ and $c < d < 0$, then $ac > bd$.

b) If $a \leq b$ and $c > 1$, then $|a + c| \leq |b + c|$.

c) If $a \leq b$ and $b \leq a + c$, then $|a - b| \leq c$.

great analysis textbook, big Rudin). I took a lot of inspiration and ideas from Rudin. However, Rudin is a bit more advanced and ambitious than this present course. For those that wish to continue mathematics, Rudin is a fine investment. An inexpensive and somewhat simpler alternative to Rudin is Rosenlicht's Introduction to Analysis [R1

'Introduction to Analysis'
(IA) by Maxwell Rosenlicht,

~~Math4317 — People~~

If I have one criticism of some mathematical authors is that sometimes 'elegance' gets priority over explanation, and then 'mathematical maturity' becomes a requirement for introductory texts when it shouldn't really be the case. Rosenlicht's is a truly good Introduction to Analysis.

basic real analysis, giving a solid foundation for direct entry into advanced work in such fields as complex analysis, differential equations, integration theory, and general topology. The nominal prerequisite is a year of calculus, but actually nothing is assumed other than the axioms of the real number system.
