The fully updated third edition of this lively and accessible book argues for the central role of media in understanding globalization. Indeed, Jack Lule convincingly shows that globalization could not have occurred without media. From earliest times, humans have used media to explore, settle, and globalize their world. In our day, media has made the world progressively "smaller" as nations and cultures come into increasing contact. Decades ago Marshall McLuhan prophesied that media technology would transform the world into a "global village." Slowly, fitfully, his vision is being fulfilled. The global village, however, is not the blissful utopia that McLuhan predicted. Nor, in a more modern formulation, is the world flat, with playing fields leveled and opportunities for all. Instead, Lule argues, globalization and media are combining to create a divided world of gated communities and ghettos, borders and boundaries, suffering and surfeit, beauty and decay, surveillance and violence. By breaking down the economic, cultural, and political impact of media, and through a rich set of case studies from around the globe, the author describes a global village of Babel—invoking the biblical town punished for its vanity by seeing its citizens scattered, its language confounded, and its destiny shaped by strife.

A sixth-generation North Carolinian, highly-acclaimed author John Ehle grew up on former Cherokee hunting grounds. His experience as an accomplished novelist, combined with his extensive, meticulous research, culminates in this moving tragedy rich with historical detail. The Cherokee are a proud, ancient civilization. For hundreds of years they believed themselves to be the "Principle People" residing at the center of the earth. But by the 18th century, some of their leaders believed it was necessary to adapt to European ways in order to survive. Those chiefs sealed the fate of their tribes in 1875 when they signed a treaty relinquishing their land east of the Mississippi in return for promises of wealth and better land.

The U.S. government used the treaty to justify the eviction of the Cherokee nation in an exodus that the Cherokee will forever remember as the "trail where they cried." The heroism and nobility of the Cherokee shine through this intricate story of American politics, ambition, and greed. B & W photographs

The phenomenon of globalization can be described as a gradual increase in the process and dependency level that combines people, society and countries from different economic, social and political aspects of the world. Development, which is a multidimensional concept such as globalization, is a concept that includes human values as well as economic, social, cultural, demographic and political dimensions. With the globalization process, a turn to use knowledge as a factor of production has been passed, and investing in people who use knowledge in production has become important. Investment in human capital leads to the importance of development concept. The relationship of the development process with the different fields pioneered the preparation of scientific works in the context of globalization and regional studies. In this book "Economic Development: Global and Regional Studies", there are academicians who work in different universities of Turkey and the World and work in the field of development. The scientific ethics and responsibility of the works in the book belong to the authors / writers who own the department, of course, and we believe that the necessary sensitivity is shown in this issue. This book in your hand is made up of 15 chapters, and development in each chapter is analyzed from different angles. We believe that the detailed content will contribute to economic development literature. We would like to thank all the authors whose paper published on this book. Our hope is to provide some ideas which can inspire academicians and students not only to understand different problems that the world is facing, but some solution as well.
